BALANCE OF POWER IN NEW HOUSE BLOC OF 22 REPUBLICANS

Progressive Wing Enters Compact to Keep Out of Reorganization Caucus

Special from Monitor Bureau WASHINGTON, March 10-Twentytwo members of the next House of Representatives have entered into a compact not to participate in the Republican caucus for the organization of the House. Most of them are members of the progressive wing of the Republican Party and represent dis-

tricts in the northwest. This group proposes to insist upon the election of Henry Allen Cooper (R.), Representative from Wisconsin, as Speaker. If the members hold together they will hold the balance of power, since the Republican majority is only 17 and there is one Socialist on Form Leber and one Indeist, one Farm-Labor, and one Independent member who can be counted on to vote with the progressive Republican group in any attempt that it may make to override the will of the conservative element.

Entering Wedge This is regarded as the entering wedge of a fight which will probably

determine the character of the presidential campaign in 1924, and perhaps prove the deciding factor as to whether Warren G. Harding will again be the standard bearer of his

The power of the farm bloc as shown in the Sixty-Seventh Congress, which was able to thwart the President's most cherished legislative projects, will be intensified many fold by this close co-operation of progressive representatives, especially in the light of the slight Republican majority in the House. Moreover, it builds up a formidable bloc in both houses of Congress able to check legislation if not to direct it, and to build up an organization independent of the Republican machine before the next

Identity of Men Secret

The fact that so many important measures were left unacted upon by the Congress that has just adjourned. and which will come up at the next Congress, plays into the hands of the progressives, who are taking time by the forelock in seeking to obtain an the forelock in seeking to obtain an organization of the House suitable to their purposes. The men who have entered into the compact to effect this purpose are in their respective districts, and the affair was learned of through correspondence which fell into the hands of a Representative now in Washington, but who refuses to give the names of the men who have taken the initiative. He said, however, that if the representatives however, that if the representatives recently elected having similar politi-cal ideas to those of Senator La Fol-lette are canvassed, a shrewd guess

China Seeks Abrogation of the Treaty of 1915

London, March 16

REUTER'S dispatch from Peking says that the Chinese
Government has notified Japan that China desires abrogation of the Treaty of 1915 embodying the famous 21 demands. This step has been taken in fulfillment of the terms of a resolution passed by the Chinese Parliament.

Dispatches from Peking late in January said that both houses of the Chinese Parliament had passed a resolution declaring the 21 demands made by Japan upon China to be null and void. The resolution directed that the Treaty of 1915 be rejected on the ground that it had never been approved by the Chinese Legislature and was therefore invalid.

VETERANS DISPLACE JAPANESE FARMERS

Hundreds of Orientals, Obedient to Ousting Edict, Leaving Yakima Valley Land

SEATTLE, March 4 (Special Correspondence)-The expected exodus of several hundred Japanese from the rich Yakima Valley in this State has come to pass. Instead of fighting the edict of the Secretary of the Interior, forbidding the leasing of lands in the valley directly or indirectly to Japanese, the Oriental farmers, urged on

by the American Legion post at Wapato, are leaving the district. Where they are going no one in the valley has as yet discovered. The majority of leases expired on March 1 and the many "abandoned" farms indicates the obedience of the Oriental struggle between military chieftains. tenants to the ruling that has ousted

The Indians, among whom the land has been divided by the United States Government, are seeking new tenants. These tenants will be white men, largely members of the American Legion, it is declared. They will pay lower rent than the Japanese have paid, but the Legion heads declare they will establish a fine American community in which clean living con-ditions will prevail.

About 100 leases are still retained

RUSSIAN RECOGNITION

CHINESE PEOPLE **READY TO BREAK MILITARIST YOKE**

Dr. Hung Declares Great Civil War Is Imminent-Unselfish Leader Desired

"A storm is about to break in China Not that there are no storms there at present. Every province has its own and there are several distinctly national disturbances. But if all the signs of China's political barometer do not fail, this spring will see an upheaval in the Far Eastern Republic beside which a bandit outbreak in Szechuan or the casual overthrow of the national Cabinet will appear in-

That is the opinion of Dr. William That is the opinion of Dr. William Hung, head of the history department of Peking University, who is in New England this week in the interests of that institution. He has long been a close observer of the undercurrents of political life in his country. He is a graduate of Columbia University, where he obtained the degree of doctors of history where he obtained the degree of doctors of history and while in Amortor of philosophy, and while in America has become nationally recognized as an author and lecturer on Oriental affairs.

In commenting further on the present situation in China to a representative of The Christian Science Monitor Dr. Hung declared: "Don't be dismayed at yesterday's report of the overthrow of the Cabinet in Peking. Chinese have long since learned to judge events in our country on other bases than those of the day's political fortunes. Our country would be much better understood in America if its friends went deeply enough to find the same bases. The Cabinet, find the same bases. The Cabinet, actually, has but little power in Peking. The real struggle for the The chieftain most fortunately situated today appoints the Cabinet. Tomorrow his opponent—maneuvering BUDAPEST REGAINS NATIONALISTS GAIN him out of place—may force that Cabinet's resignation and appoint a new one. Cabinets may come and cabinets may go, but China—and apparently her military dictators—goes on forever.

Better Element's Choice "At the present time," said Dr

Hung, in answer to a question concerning the alignment of forces, "Tsao by the Japanese. These will not expire until March 1, 1924. Until that time, when the last Japanese will distance when the last Japanese will distance with the composition of Chibli Province, in which Peking is located, the composition power. The holds the appointing power. The Cabinet before the one which has just resigned was appointed by Wu Pai-fu.
Who will apoint the next Cabinet is an impossible—if unimportant
—question to answer. It is apparent, however, that forces are lining up for a more serious conflict. Wu Pei-fu, who defeated Chang Tso-lin, war lord of Manchuria, last spring, represents the Liberal Party. To him rally the best elements of China—the students and the enlightened opinion of the country. In the coming conflict he will represent the commence of the results of the country.

flict he will represent the opposition to the present Government. On the other side is Tsao Kun, present dictator at Peking, who, alnature. With Tsao Kun is Chang Tsolin, whose present obscurity is not to be thought of as permanent, and who is merely biding his time until a day when he believes he can strike again-and successfully-for the control of the Government. Chang Tsolin is still unofficially allied with -South China's mercurial leader-and the alliance of these three leaders constitutes a very formidable opposition to the liberal program for

which Wu Pei-fu is prepared to fight. Unselfish Leadership Is Need When asked concerning the con-

structive, hopeful forces at work in China today, Dr. Hung said: "It has been apparent, since recent times, that SAY CHURCHES IN DRY REVIVAL in a great crisis such as that which now seems imminent, the lesser of two undesirable alternatives has al-Federal Council Issues Statement Lauding Enforcement most always won the day in China. area.

There is a very emphatic demand however that the British Government should not ratify the agreement or concede anything more to the French regarding the railways until the French and Belgians show a disposi-tion to give some consideration to the interference with British trade and transport.

Other Countries' Interests Affected Other countries, including Sweden, Denmark, Switzerland, in addition to Holland and others already repor terest.

It is becoming increasingly apparent that as the British policy has insisted the European nations are economically interdependent, so that injur to one part is felt throughout all. Humanitarians, Liberals, Radicals and Idealists view with abhorrence this eacetime invasion against an unarmed, intelligent and educated peo ple by a fully-equipped military power, which can proceed at will in any direction, and substitute French martial law for German civil law, with all the cruelties and the injus-tices such a change involves.

The insistent demand that Great Britain frame a definite policy to Britain. avert the far-reachinig calamities which are threatened and then make its voice clearly heard, was embodied in a resolution passed by the Union Boston Arena: Hockey, (two games), 8:15.
Wellesley College: Performance of original student operetta, "D'Armand" or "The Singing Highwayman," Wellesley Barn, 7:30.
Princeton Alumni Association: Meeting, terday, at which Ramsay MacDonald was the chief speaker. The present was the chief speaker. The present policy of drift it was said would lead not to peace but to war. The French occupation was characterized as "an act of war, pure and simple, and amounting to virtual annexation."
Mr. MacDonald said he and his party never be anti-French, that representatives of the people get into touch the French masses to create an Anglo-French public opinion for European

TO LORD BALFOUR

'Misapprehension' Says Mr. Crosby-Asked Britain to Indorse Only Russian Loan

NEW YORK, March 10 (By The Associated Press)—Oscar T. Crosby, assistant secretary of the treasury during the war, emphatically charac-terizes as a "misapprehension" the assertion of Lord Balfour in the House demanded a British guarantee before

Entering the controversy in London tween Lord Balfour and Ambassado Harvey, Mr. Crosby, who discussed war loans with Lord Balfour when the latter came here in 1917 as head of the British High Commission, and who later served in Europe as president of the Inter-Allied Council on War Purchases and Finance, declared he could recall but one incident on which the "misapprehension" might be based.

This incident, he said, was the

granting to Russia of a "relatively small loan," of \$170,000,000, upon British indorsement, at a time when Russia was represented here only by a chargé d'affaires holding over from the Tsarist régime, with no authority government of Russia, Mr. Crosby admitted, however, that this loan had been left to the charge of Great

Referring to the Russian loan, Mr. Crosby said that the situation seem "to have been so dominated by British influence that William G. McAdoo, Secretary of the Treasury at that time felt it was wise to leave the account as we found it. We knew nothing of the quid pro quo which might have existed between the indorsing Gov-ernment, Great Britain, and Russia."

Mr. Crosby continued: Lord Balfour thought we should have taken over this relatively small amount and I fancy his memory has retained the impressions resulting from the in-cident, while he has not kept pace with er vastly larger transactions, in which his Government was not asked to assume any responsibility whatever for allied purchases, other than British,

n our markets.

Lord Balfour says, "we explained to the American Government that we should be able to find all the dollars necessary to purchase our own war materials without borrowing from the United States or anybody else." Certainly no such statement came to my knowledge. On the contrary, the need of borrowing dollars for British require-ments here (and even in neutral countries) was always to the fore in my contact with the subject.

Purchases with American funds for allied accounts in neutral countries were accomplished indirectly by taking up drafts in London offered in Wall Street by neutral holders from many countries, British financial agents bought these drafts with moneys lent by us in order to protect sterling exchange rates. Private as well as pu drafts were thus taken up.

NEW FLOWER MARKET OPENS

PLAN OBSERVANCE Boston Wholesalers Make Beautiful Display

> taken down, leaving a room with more than half an acre of floor space, and lighted by an immense dome in the center. Huge refrigerators have been installed for storing the flowers, which are displayed during business hours on hundreds of white tables which

fill the room. The opening took the form of a flower show, which will last until 10 o'clock tonight and continue through Sunday. Flower growers and retailers from all the suburban towns have worked together to fill the market with the choicest blooms that can be found. Roses, carnations, narcissi. lilies and many other flowers are arranged on the tables in thousands of vases, making a display never before equaled in Boston.

Among the interesting plants shown

are some remarkable specimens of Clarkia Salmon Queen. Plants like these are seldom seen outside of California, growing several feet high. No plant exhibited excited so much curios-

ity, however, as a potted specimen of Erica Melanthera owned by Thomas Roland of Nahant. This mammoth heath is nine feet tall and six feet in diameter. It is believed that no such specimen has ever before been shown n New England. The plant is in full bloom and remarkably beautiful. Mr. Roland is also showing some fine

The opening exercises included remarks by Mr. William C. Stickel of Lexington, president of the Boston Flower Exchange, Inc., which controls the 'market, State Senator Wallace Pierson of Cromwell, Conn., and as one of the afternoon visitors. Soon raised, former Lieut, Harold Patten of Tewksbury, a famous carnation grower, being in charge of the cere-

The show, which is being largely attended, is free to the public and offers an unusual opportunity to see the finest collection of florist's flowers ever assembled in Boston.

MERCHANTS ACTIVE IN INDIA'S POLITICS

Chamber of Commerce Meeting Shows Extent to Which British Are Drawn Into Problems

By Special Cable

CALCUTTA, March 10-The annual meeting of the Bengal Chamber of commerce, which has been postponed for a week to permit the president, Sir Campbell Rhodes, to attend the debate in the Legislative Assembly on railway policy was noticeable for the extent to which it showed leading British merchants are forced to enter Indian politics

In his speech Sir Campbell referred to the passage of the Workmen's Com-pensation Bill in the Legislative Assembly and said the amendments suggested by the chambers of commerce had been accepted by the Government and the Assembly. He urged the purchase of sterling for remittances home to be regulated in India and not in London. He attempted, not very successfully, to defend his attitude in signing the majority report of the fis cal commission.

He declared that the revenue of the Indian Government was being increasduties, almost protective in character, them scientifically than in a haphaz ered that Sir Basil Blackett was work ing on sound financial lines and de served the fullest support. He strongly assembly in favor of an extension of state management of the railways and said many Indians were equally op posed but it was most important that the opposition should prepare a scheme of genuine company manage-ment, with capital domiciled in Iadia. He believed such a scheme would not be rejected by the assembly.

Sir Campbell welcomed the recom mendations of the Inchcape committee and referred to the labors of his own retrenchment committee in Bengal. He concluded his speech with several necessity for a new Howrah bridge, education, and rent control.

The President's views in discriminating against protection were

LABOR VOTE HELPS LADY ASTOR'S BILL

Solidity of Party's Support One of Features of Debate in British Parliament

By Cable from Monitor Bureau LONDON, March 10-A remarkable feature of the debate on Viscountess Astor's temperance bill in the House of Commons here yesterday was the solidity of the support afforded by the British Labor Party to this endeavor to remove temptation from the rising

Journals like the Morning Post, the Daily Mail and the Daily Express to-day endeavor to belittle Viscountess insistence upon the demand that it shall not be allowed to become "the thin end of the wedge" for a wider neasure of temperance legislation in this country is evidence of the con-sternation in anti-prohibition circles it has produced.

Scope of Measure Limited

The British Government's action in uncertain though, as the Daily News oints out, the largeness of the maority by which the second reading en passed may induce it to

reconsider this point.

Many of those who supported the measure would have liked to widen ts provisions, but Viscountess Astor wisely confined its scope, so as to marshal the maximum of moderate opinion on its side, with a result greatly to improve the prospects of its ultimately passing into law.

LONDON, March 10 (By The Associated Press)—Even though Lady Astor's prohibition bill is not expected become law, despite the fact that it passed its second reading in the House of Commons yesterday afternoon by a vote of 338 to 56, it is admitted on all sides that she achieved a remarkable parliamentary success and enhanced her reputation as a member of the British Legislature.

Discussion on High Plane Most of the newspapers give Lady Astor front page space this morning. With scarcely an exception they admit

that the discussion of the bill, which would prohibit the sale of intoxicants to youths under 18 for consumption on the premises where it is sold, was on a high plane and that Lady Astor showed praiseworthy restraint in presenting her case. It is also pointed out that the Com-

GREATER BOSTON

Metropolitan Commission Bill to

PLAN APPROVED

Be Reported Foreshadowing greater co-operation etween the cities and towns of the Boston metropolitan area in solving their common problems of traffic and transportation, the Committee of Metropolitan Affairs of the Massachusetts Legislature has voted unanimously to report the bill establishing a metro-

politan planning commission. The proposition, both in that abstract and specific, has been argued at length before legislative committees, the public utilities commission and various organizations during the past year. As a result there is active and general support of the measur and virtually no opposition. It has been increasingly realized that the answers to questions of highway con-struction, transportation facilities on rail and road, and traffic congestions declining to promise facilities for its must be made on the basis of study of further progress leaves its fate still general conditions in the metropolitan

ceptance that this district must be considered as a unit in such matters and that the most satisfactory means lies in a commission that shall have powers of investigation and recom-

Other measures reported upon by committees after adjournment yester-day include a favorable action on the bill increasing the number of assistant district attorneys of Suffolk County from six to eight and on the bill increasing the salary of the chairman of the Boston Finance Commission. An adverse report was made on the measure under which the Mayor of Boston would have authority to fix license fees

in cases not covered by law. Another report which is expected to lature is that of the Committee or Power and Light referring to the next annual session the bill prohibiting the levy of the service charge by gas and electric companies. This is a moot issue that has been before the Department of Public Utilities for more than

best-humored debates ever held, with-out losing sight of the serious side of the question. It is extremely rare for a private member's bill to get such an overwhelming indorsement.

The proof of the people of Maiden and Melrose from the levy of such a charge by the companies in those communi-ties. It is expected that a movement will be made to take definite action on the bill this year.

WORLD COURT HALES GERMANY ON ALLIES' KIEL CANAL CHARGE

First Time Sovereign Power Has Been Arraigned by Others-Franco-British Dispute in Hand

By FREDERIC WILLIAM WILE

United States into the Permanent Court of International Justice, official reports reach Washington of the first tire equality."

active operations of the world tri
The League record states that "This bunal. Secretary Hughes has had opportunity to study the formal record of the first international dispute re-first example in history of the arraign-ferred to the court, consisting of the ment before an international court of proceedings issued by the League of a sovereign state."

Nations. The record arrived in Washsovereign states." ington this week. It covers the extraordinary session of the court at of Nations, in which the proceedings The Hague, which was called in of the World Court are reported, notes extraordinary session in January to with gratification that the United consider a controversy between Great States for the first time was repre-Britain and France and a case brought sented officially at the meeting in against Germany for having refused
passage through the Kiel Canal to a
British ship. The last-named case is
the first instance in history in which a
sovereign state has been so arraigned
before an international tribural

It is plain from the gravity of both the British-French case and the proceedings against Germany that action concerns the sort of dispute that old-time diplomacy used to go to war about. The British and the French are at loggerheads over na-tionality decrees in Tunis and Mo-rocco. Their respective contentions were urged with the greatest tenacity.

Franco-British Differences The question mainly at issue is whether the nationality decrees of the French Government, the Bey of Tunis and the Sultan of Rabat, and their application to British subjects, are matters of purely French domestic

Both litigants presented their cases to the court in public sessions, and a decision is expected momentarily. Great Britain was represented by Sir Douglas Hogg, Attorney-General; Sir Ernest Pollock, formerly Attorney-General, and a law officer of the Foreign Office. France was repre-sented by M. Merillon, Procurator-General at the Cour de Cassation, and M. de Lapradelle, professor of Inter-national Law at the University of Paris. By common consent between representatives of the two governents, the British point of view was stated first to the court. Then there was a reply on behalf of France, followed by another statement by a representative of each party, France having the last word. There were four separate hearings. At the ter-mination of the last one, the repreentatives of both powers filed their final conclusions in writing.

The case against Germany deals with that country's refusal to permit the British steamship Wimbledon to go through the Kiel Canal. Germany is arraigned by the four so-called "principal allied powers" — Great Britain. France, Italy and Japan. These states claim that Germany's refusal was contrary to the provisions of the Treaty of Versailles affecting the Kiel Canal. Under authority given in the Treaty, they have ity given in the Treaty, they have but their own local control, and had brought proceedings before the Pertrached a state of virtual anarchy."

POLISH MINISTER DENIES WAR RUMOR

Ladislas Wroblewski Designates Valdemaras Carneckis' Prediction as "Real Folly"

Special from Monitor Bureau NEW YORK, March 9-Ladislas Wroblewski, Polish Minister to the United States, who has come to New York on a business trip, took issue today with the statement of Valdemaras Carneckis, Lithuanian Chargé d'Affaires in this country, recently published in the press, that further seizure of Lithuanian towns by Polish troops will mean war between Poland and Lithuania."

"In so far as Mr. Carneckis says this means war," said Mr. Wroblewski to the correspondent of The Christian Science Monitor, "he is making a purely gratuitous assumption. But if he implicitly declares that Lithuania loyally agrees to the decision of the League of Nations and that the Lithuanians only want to assume their authority in that part of the neutral zone that was allotted to them, then from the Polish point of view I claim that peace is absolutely assured."

Mr. Wroblewski declared that the The case against Germany deals fact that disorders have not been re-

Passage of Legislative Bill Without Debate Looked Upon as Public's Indorsement of Institution

power has been granted to Northeast- nasiums, swimming pool and social ern University of the Boston Young and athletic features at minimum cost. By joint use of Y. M. C. A. buildings and equipment for day and unanimous passage of a bill for this night classes a school has been depurpose through the Massachusetts veloped operated at a net cost only Legislature, signed this week by Gov. expected in a university of similar Channing H. Cox. The event marks, according to Frank Palmer Speare, grade, president of Northeastern, another Fran step in the development of an educational undertaking begun 72 years ago. which now is known throughout the United States.

The Boston Y. M. C. A. in 1851 started as part of its original program, classes for employed men. They were at once successful, but they were not correlated, and followed no specific line of development. In 1896 the directors decided to create a special educational institution to train young men and boys, and from that date the school's growth has been steady and successful. Now, by the passage of the recent bill without debate through the Legislature, acknowledgment has been made by the State of the value and permanence of Northeastern Uni

A Christian Organization

Since 1896, course after course has been added to the curriculum. These courses have been gradually grouped into schools, and from time to time those of the collegiate grade have been incorporated with degree-granting In 1916 all schools merged in "Northeastern College," which became "Northeastern Univer-sity" in 1922.

Good Law School Showing

The evening school of law, started in in 1898, was incorporated in 1904 with degree granting powers. The evening school of engineering, estab-lished 1909, granted degrees from 1920. The day school of business administration was started in 1922 with degree granting power. The evolution of these schools may be traced by the number of their graduates, and by those now in attendance. Law school graduates, for example, to a percentage of 86, have passed bar examinations, and the remainder are generally in business, never having had a desire

to practice law.
Including all the evening classes, the boys' day preparatory school, the automotive school, the vocational institute and other departments, many thousand students have attended classes. Northeastern has had 50,000 students since 1896, about 1500 getting The day school of engineering, offering part time instruction in ings free of rental, except for a mini-co-operation with Massachusetts in-mum charge for light, heat, janitor dustrial concerns, has a student body of 920 regularly enrolled.

Governor's Own Investigator Finds Conditions Should Be Changed

That Massachusetts needs a new prison system and that while conditions are generally good at the Charlestown State Prison, the building itself is obsolete and "unfortunately situated," are two of the con-clusions reached in the report made to Channing H. Cox, Governor of the Commonwealth, by W. Cameron

Forbes, former Governor-General of the Philippines. The report was made public today. As a result of agitation during the 1922 session of the Legislature for a new State Prison and repeated recom-mendations to this effect by those in

charge of penal institutions, the Gov-ernor asked Mr. Forbes to make an investigation. As a result of this inquiry, the executive, in his inaugural

cifically for a new prison. In his report Mr. Forbes says that

gigl in his "Interior" gives the im-pression of a love of the work and great care of handling, together with particular attention was directed to three charges made against the prison and its administration. These the application, with knowledge and were that the buildings are unsuited; appreciation of pigment and medium, of the modern color scheme. Freder-ick A. Bosley's "Still Life" is sincerely that the officers are unduly harsh and severe, and that the system is re-pressive instead of seeking to bring out the best in an inmate.

The first charge is founded in facts

that none can deny, Mr. Forbes says, adding that correctional authorities feel that improvement in other conditions cannot be made until the physical facilities have been changed. In specific instances there have un-doubtedly been cases of harshness, the report says of the second charge. As to the effect of the system in repressing the prisoner, Mr. Forbes says that the charge is "in important measure justified."

measure justifie Going more into detail, the report states that there was found to be wide difference of opinion about the character of the officials. The majority are said to appear earnest and humane but a certain proportion abused their positions, performing such practices as breaking the sleep of the prisoners be noted. It is Leonard Craske's as breaking the sleep of the prisoners "Dawn." The name is not essential by flashing flash-lights at them and goading them into retort to be followed

> With respect to punishment, the report says that the records show the use of solitary confinement to be limited. Mr. Forbes continues to say, however, that "the records show orders of dark solitary confinement for periods running from three to ten days for causes which on the face of it did not justify any such treatment."
> Mr. Forbes states that he is "reluc-

> tantly" forced to the conclusion that the State needs a new prison system. He therefore recommends that a com-mission be appointed to study the question. Such a commission, he says, should include representatives of the Department of Correction and the modern school of penology.

In the concluding statements of his report, Mr. Forbes takes occasion to urge that suitable farming land be in-

ENGLISH TEACHING SURVEY FAVORED

New England Organizations Seek Best Methods

Action in support of the movement petitioning the General Education Board to appropriate \$60,000 for investigating methods of teaching English in secondary schools in the United States was taken at a joint meeting today of the New England Association of Teachers of English and the New England Public Speaking and Oral English Conference held in Huntington Hall. Huntington Hall.

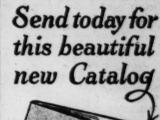

It was pointed out that no other subject in the curriculum affects so many people or so many of their ac-tivities and that the results of the teaching now given are unsatisfactory to business men who criticize both the spoken and written language of high school graduates. The teachers seek to know the best practice and soundest theory and ask for recommendation as to what is desirable and what is legislative committee, together with three different bills providing specifically for a new prison of indorsement by teachers' organizations. It is believed that this subject is worthy of as careful investigation as the subject of mathematics or the classics.

The 'morning's program was given over to technical discussion of speaking and reading problems. The afternoon program called for a talk on pageantry by Percival Chubb of St. Louis, Mo., and plays in school and college by Prof. George Pierce Baker of Harvard University, both leaders in their respective subjects.

Miss Sally Freeman Dawes of the Quincy High School, Quincy, Mass., was elected president of the New England Association of Teachers of Eng-lish and A. B. DeMille of Simmons College was re-elected secretary and treasurer. C. A. Cockayne of Springfield, Mass., was elected to the executive committee.

GERMANY HOLDS AMERICA AT FAULT

Ruhr Occupation by France Could Have Been Prevented —Attitude of Students

This is the first of two articles giving an intimate glimpse into the trend of German thought at the present moment, the outstanding feature of which is the irrefragable belief that France is bent on conquest.

BERLIN, Feb. 15 (Special Correspondence)—America has failed the world again. This charge is on many tongues in Europe today, when France and Germany have revived their ancient feud. There is nothing flattering in what men are thinking about America but it is informative.

The Christian Science Monitor correspondent here has asked many persons to give him their opinion of
what France wants in Germany; why
French and Belgian troops are billeted
in German homes far eastward of the
Rhine; why thriving German industrial communities and busy, strategic
rail centers resound with the tramp
of French and Belgian soldiers with
rifies and machine guns, cannon and
tanks. For answers to these questions
he has sought out Government officials
and political party leaders, foreign observers, generals and naval men and
even the "common people," the backbone of this Nation.

America Held Responsible

Almost to a man the Germans hold that France is bent on conquest, or, at least, on hegemony. There is no arguing with them, if one would argue. They see things their own way. They will see them no other way. But it is significant that they hold the United States could have prevented this French action in the Ruhr, and, what is more to the point, that Germany, having accepted peace with the alifed and associated powers on the basis of Mr. Wilson's "fourteen points," it was the duty of the United States to intervene.

Outside German circles another view is held. It is non-partisan and may be characterized as the view of European experts. It is, briefly, that France seeks nothing more or less than, first, security against future German aggression and, secondly, as much reparations as it can get. The first is essential to its future. The second would enable it to repair the damage which Germany did in France. It would forego the second for the

The Guarantee Pact

Not long ago France thought it saw a way which pleased it of getting its first essential requirement. It was in the guarantee pact which Mr. Wilson and Mr. Lloyd George signed with France in Paris. When America, through the action of a small group of irreconcilables in the United States Senate, failed France in this, it failed the world, and made inevitable the occupation by France of Germany's Ruhr Valley; such is the thought held in Germany.

These are two views here. One—the first—does not see all things clearly. For years it has been directed by a political propaganda which would seem crude to other eyes. The other view is that of men who possess keen powers of observation and analysis. No German will admit, save in the friendliest, most intimate conversation, that Germany would make another war on France. However, obvious facts speak for

selves.

Another War Threatens

A residence of a few months in Germany will be sufficient to convince anyone who has means of obtaining reliable information, that there will be another war between these powers when Germany is ready, unless the world intervenes and disarms them. On the other hand, no responsible

On the other hand, no responsible Frenchman will say that Germany is ready now, or will be ready in a year or two, to wage a war. For the present, France is satisfied that it is safe, but it is looking beyond today into tomorrow. What does it see? It sees a Europe given over to intrigue; a Europe which has not learned that war brings nothing save destruction and misery. In Germany it sees a constantly growing hatred of France, a rapidly increasing man-power. On every hand it sees that hatred of France and everything French is fostered and nurtured throughout all Germany.

Not the least significant of these signs of the times which the French see are those which are to be observed in the German schools and universities. Men whose business it is to work among these students and who have studied them closely have declared to me that at least 60 per cent of the German students are opposed to the present Republican form of government and stand unequivocally for a return to the monarchical system. These students hold that the German people would be happier, wealthier, greater as a world power if they were under an emperor or king. The remaining 20 per cent are nationalist, but not monarchist. They are 100 per cent against France.

are 100 per cent against France.

German elders, when asked about this student thought, laugh at it and profess that it is of no consequence. They declare the German students are simply tresponsible youths and young

They would discredit the spontaneity of youth and would overlook the fact that German scholastic training is thorough, lasting, and that the youths and young men of today will be the active forces which will mold the thought of the Germany of tomorrow. That which these students are learning now they will not soon forget.

IRISH TRADE COMMISSION BUSY
DUBLIN, Feb. 22 (Special Correspondence)—The Commission on Reconstruction and Development appointed by the Ministry of Industry and Commerce is now fully constituted under Senator Sir J. P. Griffith. It is to inquire into the prospects of trade and industry, make suggestions as to stimulation of commerce and manufactures, and advise on the relief of unemployment.

SAMARANS IN NEED OF OUTSIDE HELP

Speedy Aid Would Alleviate Famine Conditions Arising Out of Bolshevist Rule

REVAL, Feb. 20 (Special Corre-pondence)—The Rev. Mr. Lezius has cently arrived in Reval from mara, where he worked from 1913,

Samara, where he worked from 1913, until last November when, after strenuous efforts, he gained permission to leave Russia. Speaking to a correspondent of The Christian Science Monitor, he said, in part:
You cannot imagine the appalling conditions obtaining at present in that region, which was once one of the richest provinces of Russia. Famine has decimated the population to such an extent that you can travel miles and miles without meeting a human being. extent that you can travel miles and miles without meeting a human being. I traveled lately 100 versts by carriage across the country, passing through many villages, but the only domestic animals I saw were two dogs and four hens. In some villages, especially in the districts colonized by allen races, there were still some horses, cows and camels, but they were so starved last surply that the pessants had to carry spring that the peasants had to carry them to the pastures, where they re-covered comparatively quickly.

Bolsheviki Collect Grain

Bolsheviki Collect Grain

The harvest was quite good last year in some parts of the Province, though the peasants had sown the corn without plowing the fields. However, the contributions in grain collected by the Bolsheviki are so exorbitant that nothing is left to the population. This has enabled the Bolsheviki to export a certain quantity of grain to Finland and to exchange it for the foreign products they need for the maintenance of the Red armies, but the population is worse off than it was a year ago.

The work done by the Swedish Red Cross is very useful and efficient; they feed entire villages and provide moreover clothing and whatever is needed by the population. I saw Consul General Ullgren, who is at present at the head of the Swedish Red Cross; he told me that they are going to discontinue their activities.

My parish comprised the town of Somera and the Protestant villages

My parish comprised the town of Samara and the Protestant villages along the frontier of the Province of Kazan. The population are immigrants from Poland and the Baltic states who settled there about 1860. Being on a higher level of civilization and endowed with more energy and initiative than higher level of civilization and endowed with more energy and initiative than the surrounding Slav population, they have resisted more successfully the hardships of the present time. They cultivated last year about one quarter of the former area and their crops were quite good; but in many cases the quantity of the contributions collected by the Relepsylit was more than the by the Bolsheviki was more than the entire harvest and the peasants had to sell part of their remaining live stock in order to make good the difference.

All Expect Pogrom

Bolshevist agents who venture in the villages, even when they come in twos and threes, are always killed, and only

men left in Russia now, and I left all the plans of the architects, York of laymen, who promised to read the services and perform the rites as best ing Gothic in style with a varied services and perform the rites as best ing Gothic in style with a varied services and perform the rites as best ing Gothic in style with a varied services and perform the rites as best ing Gothic in style with a varied services and perform the rites as best ing Gothic in style with a varied services and perform the rites as best ing Gothic in style with a varied services and perform the rites as best ing Gothic in style with a varied services and perform the rites as best ing Gothic in style with a varied services and perform the rites as best ing Gothic in style with a varied services and perform the rites as best ing Gothic in style with a varied services and perform the rites as best ing Gothic in style with a varied services and perform the rites as best ing Gothic in style with a varied services and perform the rites as best ing Gothic in style with a varied services and perform the rites as best ing Gothic in style with a varied services and perform the rites as best ing Gothic in style with a varied services and perform the rites as best in groups are to be found in Massachus across the street from the girls' gym-setts, where there are 140 members, advisory committee of 50 clergymen across the street from the girls' gym-setts, where there are 140 members, advisory committee of 50 clergymen across the street from the girls' gym-setts, where there are 140 members, advisory committee of 50 clergymen across the street from the girls' gym-setts, where there are 140 members, advisory committee of 50 clergymen across the street from the girls' gym-setts, where there are 140 members, advisory committee of 50 clergymen across the street from the girls' gym-setts, where there are 140 members, advisory committee of 50 clergymen across the street from the girls' gym-setts, where there are 140 members, advisory committee of 50 clergymen a

MICHIGAN UNIVERSITY **GRADUATES TO MEET**

The alumni and alumnæ of the University of Michigan in New England will hold their annual joint dinner to-night at the Hotel Vendome, at which Dr. Marion LeRoy Burton, president of the university, will discuss probfronting the institution. About 125 to 150 graduates are expected of the the 800 scattered through New England.

The rapid growth of the university since the war, which has caused an increase in enrollment of about 3400, is the chief concern of Michigan graduates at present. The problem of supplying the university with adequate buildings for new class rooms and dormitories is likely to be the central topic of tonight's gathering. Dr. Burton will probably deal with the question of expansion for the benefit of

Monthly dinners are held regularly by Boston alumni, and women graduates also have monthly meetings, but tonight's dinner is the one time in the year when both groups meet to training prepared the student only for discuss common problems.

University of Michigan's Growth Shown by Building Program

UNNAMED ALUMNUS AIDS LAW SCHOOL

Provides Fund to Establish Club and Dormitory - Women Start Building Drive

ANN ARBOR, Mich., March 3 (Special Correspondence)-Erection of two buildings—one a combination lawyers' club and dormitory, the other to be known as The Women's League Building-a club for the undergraduate women, are features of a progressive program outlined by officers, students and graduates of the University of Michigan. The Law School addition is made possible through the act of an "unnamed alumnus" of that school. The women's clubhouse will be financed by the alumnæ and stu-

dents jointly.

The "friend's" gift (he is a New York lawyer) is said to be the first of its kind given to the University of Michigan Law School by any alumnus. His offer will more than provide for the project, it is understood, and was prompted by a desire to perfect the environment of the law student and to establish a fitting memorial. Financial plans for the women's clubhouse call for the raising of \$1,000,000, of which \$750,000 is to be spent for the building and \$250,000 is to be reserved as an endowment. With the comple tion of these projects, architects declare, the University of Michigan will have one of the finest groups of university buildings in the country.

Unexcelled Equipment

cream-toned stone for the exterior women's social and athletic activities, as one of their leaders. material. The building will occupy and their future dormitories will be two-block front between the located in this district. Michigan Union and the Martha Cook The building will be constructed

University Avenue will be occupied by a picturesque tower, under which will be a wide archway leading into an inner quadrangle. The commons or general assembly rooms will be located on South State Street, immediately south of the lawyers' club, and south of the commons will be a great dining hall.

Funds for Education

It is hoped, ultimately, to establish in this area a unified law college. The most remarkable feature of the donation is that through the profits de-rived from the dormitory and club will come a generous income for legal research, which will result in improvements in legal education.

In discussing the broad views said to have been expressed by the donor other law educators point out that "Until the last 20 years or so, legal

SETTLER IN AUSTRALIA NEEDS RAILROAD AS WELL AS WATER

State Governments Must Either Build Railways or Else Expropriate Some of the Large Holdings

This is the second of two articles dealing with Australia's need for development and the utilization of its vast potential icealth, which might support a population of many millions. The first appeared in yesterday's Monitor.

Why, it may be asked, has the growth of population in Australia been so slow? The total net gain by immigration since 1861 is less than 1,000,000, while the natural increase during the same period was 2,500,000. Of the present population 87 per cent are Australian-born. It is true that just before the war the number of im-migrants was increasing: it was slightly greater than the number of births. Checked by the war, it may again reach the pre-war figure of 80,-000 yearly. But even a net annual gain of 150,000, including the natural in-crease, is in no way sufficient to populate Australia's empty spaces.

Other undeveloped countries, such as Canada and until recently the United States, have attracted far the greater numbers, although Australia can offer to the settler advantages as great and prospects at least as prom-

One reason for this lies in the great distance from Europe. The expense and discomfort of a seven weeks' voyage are enough to lead many to prefer the nearer countries of North America. In spite of this unavoidable disadvantage, a vigorous policy might have overcome the difficulties. But public opinion in Australia has always been somewhat lukewarm on this subject. Moreover the Labor Party, which was until 1915 the dominant party in the Commonwealth Parlia-ment and in several of the states, has always opposed state-aided immigra-

Immigrants Drift Back to Towns Labor depends for its support largely on the population of the large cities which have grown up as a result of the high tariff wall. Naturally the industrial workers of these cities view with suspicion any attempt to introduce from other countries large numbers of immigrants who might be thrown on to the labor market and so reduce wages. For experience of the past has shown that, though attracted in the first instance by the offer of cheap land, a considerable number of immigrants tend to drift sooner or later back to the towns.

which home-made things are sold. In There are signs, however, that a change of policy is imminent. Widehungry student rushes between classes. The popularity of this stand is evidenced by the fact that over \$3000 profit has been realized. spread unemployment in Great Britain has made harassed British ministers turn with longing eyes to lands less overcrowded. The events of the war and the numerous international con-ferences that followed have impressed Australians with the interdepend of all the nations of the world. "GUIDE" APPOINTED

At least two great Australian news-papers, one in Melbourne and one in Sydney, have taken up the question with force and energy. For the first time in Australian history an associa-tion, called the New Settlers' League, has been formed with the object of encouraging immigrants of the right kind and affording them a welcome

and assistance on arrival. The "non nation" plan, by which citizens a entitled to nominate friends and the families for assisted passages pr vided that they accept responsibili-for their support, has received a fra-impetus: in Victoria alone as many 20 nominations a day are received

Settlers Need Greater Attracti But these laudable efforts will only touch the fringe of the problem. Something more is needed if immigrants are to be attracted in large numbers. First of all, land must be made available, and in spite of the vast acreage still unsettled, arises the first great difficulty. be of any value to the settler, land must not only be provided with water a railway.

The states' governments are faced, therefore, with two alternatives: either they must build new railways, either they must build new railways, or they must expropriate in one form or another some of the large holdings. Both of these policies can be reduced to a question of money. The policy of expropriation has been tried on a small scale by the Queensland Government, with the result that they found themselves faced by a boycott on the part of London financiers when they required a loan for development purposes.

purposes.

The development policy, though sounder in the long run, involves an even heavier expenditure: the building which must remain for of railways, which must remain for some time at least non-profit bearing, and the carrying out of irrigation works, which is an expensive business. Apart from this, it is estimated that each man put on the land needs a capital of £2000 to give him a fair chance of success. At a conservative estimate a loan of £200,000,000 will be required, spread over a period of 10 years. In this way it is probable that something like 1,000,000 new set-tlers might be provided for over and above the normal influx of from 80,000 to 100,000 yearly. Unfortunately, the public debt of Australia is already £800,000,000, or £160 per head of population. Both Commonwealth and states have found increasing difficulties in raising loans, and it is doubtful if such a loan could be floated in the ordinary way.

BOSTON'S AUTOMOBILE SHOW JAMMED WITH BUYING THRONG

Opening Finds Purchasers and Sellers Optimistic—Artistic Setting Offers Brilliant Scene

The Boston Automobile Show of Mercer cars; these companies have 1923, the twenty-first of its kind, previously only had four-cylinder models. The new designs will not mean giving up the present types, it is understood. 3000 years, for the most recent inventions of American ingenuity are set in an Egyptian background. At marica seem and America seem is ahead. first glance, Egypt and America seem to take about equal honors in the ex-hibit which, like the circus, is this year unquestionably bigger and better than ever. The 5000 electric lights, the noise, the brilliant setting, the crowds and the highly-polished models will dazzle most visitors on entering, for spark plugs and obelisks, stop-lights contraptions, and contraptions of an ancient civilization, as pictured on panels round the walls, are seen all at once. Thousands viewed the exhibition during the afternoon and are seen all beld in connection with the jubilee from a small English collection. bition during the afternoon and eve

The motor show is crowded with cars, parked in a brilliant and novel decorative scheme. The effect may not be wholly Egyptian, but Egypt is the motif, and the result is a Nile palace with gorgeous Yankee improve-Oriental draperies make a canopy; the entrance portico is fin-ished in gold, with red and blue fret-work, studded with lights. There are ginger ale booths and popcorn stands and there is an "electric ceiling" and four "crystal bridges." Electricity shines, twinkles and glows every-where; it is even reflected in the surface of innumerable autobodies. The setting may be ncient, but the cars have a 1923 finish; their designs are ultra modern; Egyptian kings in all their splendor never dreamed of the elegance and luxury now offered American mo-

Accessories are Practical

Chester I. Campbell, director of the show, says that 74 pleasure car makes, and 42 makes of motor trucks are on display together with exhibits of tractors and farm machinery. The trucks are below stairs, the others above. "There are more cars in the exhibit than ever before, and more accessories—25 per cent more of the latter than in 1922—and these acces-sories are of the practical kind which have been made necessary by the general demand for all kinds of fittings to go with inclosed cars. This year's show will be the greatest ever staged here."

The corners and the balconies of Mechanics Building are crammed with the booths of accessory makers nd the displays of fittings, oils and lubricants. The exhibitors' names apover their booths.

In the balcony a garage and "ser-In the balcony a garage and "service station" have been erected, and there everything is but the traffic cop, who isn't wanted. In the basement is fire-fighting apparatus. The trucks below stairs are as interesting as the passenger vehicles above, in their massiveness and power. A traveling motor-house has a place in the basement, which would make a gypsy willing to swap in his caravan. The van has all the comforts of van has all the comforts of home and a few more, such as conertible beds, plenty of elbow room fly-screens over curtained windows closets. It is a compact sum mer camping equipment with which to trundle over America.

SWEDISH FARM SHOW SEEKS AMERICAN AID

Special from Monitor Bureau WASHINGTON, March 10 - The

Swedish Minister, Axel Wallenburg,

exposition at Gothenburg, Sweden, May \$ to Sept. 30 of this year.

The note, in part, is as follows: I have been instructed by the Swedish Foreign Office to apply for Your Excellency's good offices, in order that information regarding the agricultural show may be brought to the knowledge of the institutions in the United States (official and others) which may be interested, and I take pleasure in transmitting to you under separate cover some circulars describing the exhibition in question. It would be very gratifying indeed to Sweden if the institutions in the United States concerned could see their way to giving the show such attention as the circumstances warrant.

\$200,000 PRICE PAID

FOR HALS PORTRAITS NEW YORK, March 10 (By The Associated Press)—Max Epstein, president of the General American Car Company of Chicago, has purchased two portraits by Franz Hals and Peter Paul Rubens for \$200,000.

The Hals "Portrait of His Daugh-

THE report of the Census Bureau section of the main frame side memplaces the total output of cars and trucks in the United States for January, 1923, at 240,903. Of this number California sold 15,109 vehicles, which is a gain of 126 per cent over 1922 the largest increase ever made.

New American Buss which is a gain of 12s per cent over 1922, the largest increase ever made over a corresponding month, in the automotive history of this state. In January, 1922, the figures showed a total of 6694.

Owing to control of the rubber market by Great Britain, who is anxious to develop her tire industry and give em-ployment to thousands of men now out of work, it is almost a foregone conclusion that tires in America will rise in price until we find a source of supply which can be under the supervision of this Government. Quoting Dr. Cook of the Department of Agriculture, from his memorandum to the House committee in Washington recently, who said, "unless rubber plantations are developed in areas outside the British and Dutch dominions, the United States will always be faced with the possibility of such restrictive measures as are now being practiced in British Malay and Ceylon. The fact that one nation controls 70 per cent of the crude rubber supply and two of them 95 per cent of it, puts monopolistic power in the hands of one or both; and the only way to prevent the use of such power is to promote minions, the United States will always the use of such power is to promote the development of plantations in other parts of the world. Should a motor development occur during the next two decades comparable to that which has taken place in the United States since 1910, the supply of crude rubber in the world will prove inadequate." In the Philippine Islands, Ecuador, Colombia and Venezuela, vast tracts are adaptable to rubber cultivation. An ap-propriation of \$500,000 has been voted by the House for the purpose of investi-gating all possible supplies of rubber.

New Mexico Duty With the placing in effect of a new import duty of 85 per cent on ordinary automobile tires and 68 per cent on cord tires, the use of imported tires in Mexico is practically prohibited. This

Beston Show Has Reputation
Today's opening begins what is hoped will be the greatest season in the country. Boaton shows have this reputation, for, unlike New York, they come at a season assumed to be spring, when families are ready to buy. The amouncement of the National automobile Chandor car roadiction was the third largest on record, with 270,995 cars and truck built, is taken as proof that the show here, on which more money has been spent than ever before, will break records.

New American Buss

A new bus design with seating ca-pacity for 29 passengers and driver, and with an average frame height of but 25 inches from the ground, has been developed experimentally by one of the large American truck manufacturers. The chassis, distinctly designed for bus use, is different from the ordi for bus use, is different from the ordi-nary design, inasmuch as the floor boards over the bow in the rear axle have been cut away and a thin steel plate substituted with a resulting gain of & inch. The frame has a kick-up at the rear end and a bottle neck con-struction at the front. The springs are underslung.

The gearset shafts are mounted or annular bearings with the exception of the journal bearings on the front end of the main shaft which is a roller type. An overdrive is incorporated with a ratio of .74 to 1. The gearset unit and the engine are separately mounted, both of which are suspended at three points. There is a universe the clutch and the gearset an another between the gearset and the rear axle. The rear axle is specially made from a combination of two other designs, with carrier mechanism having special housing to accommodate the extra wide track. The brakes are of 21-inch diameter with 3%-inch face. The drums of cast steel with integral cooling fins are designed with a large oversize factor to take care of heat dissipation, which is apt to occur through continuous work in city traffic.

Special Demountable Wheels The wheels are special demountable cast steel disks and can be removed without disturbing the bearings or bearing adjustments. This practically eliminates the chance of dirt getting into the bearings. The front axle is a reversed type which provides a large drop between the wheel spindle and the spring pad without bad offsets in the steering arm or cross tube. It also gives a simple beam forging and with Mexico is practically prohibited. This country has also levied an increase of 1.50 pesos per gross kilo as an import duty on engines for automobiles and spare parts, and on bodies and frames for vehicles and separate parts, whether painted or not. The idea behind all these taxes is the development of Mexican industries.

One of the large cab manufacturing companies has adopted the large over-

create a market for them.

Stabilization has been the outstand- adding certain accessories to origina equipment as they have proved them-selves, thus strengthening the indus-tries manufacturing them and eliminng tendency in the automobile accessory field during the past few years, and with the opening of the 1923 season it singularly marks conditions in the industry. This fact is significant and of prospects in this essential branch of the automobile industry.

It has been emphasized frequently

with respect to automotive manufac-ture that its remarkable strides to the forefront of industry in the United States have not been accompanied by the manipulations, combinations and financial vagaries often attendant financial upon rapid expansion in a new industry. By reason of the conditions of competition that have prevailed and by virtue of the soundness and vision ability of the leaders, the automo bile industry has won a fundamental

onfidence and respect.

It has become the custom, however to think of this industry in its outward spects, to recognize it as an immense business grown up within two decades as a product of invention. But within the industry and by its side the process of invention is still going on, process of invention is still going on and while improvements are still being made on engine, transmission and ignition, the accessory branch of the ndustry is just falling into line.

Many Appliances in Field

It is doubtful whether the average to the sum total of specialty access motorist realizes exactly what falls improvement has been achieved with under the heading of accessories. He respect to the stop-light, overcoming sories on the market. Considerable is likely to think of accessories as many of the original difficulties, inthose appliances that go to swell the cluding frequent breakdown and short-circuiting. Many variations of the first year's operation of the "stop" signal to include "slow" the motor vehicle; or perhaps he in- warnings and announcement of "turn" cludes in this classification the spark are on the market, many of then plugs, light bulbs, fan belts or the highly satisfactory, as well as valuable little contraptions advertised as savers of gasoline.

All these fall into the immense ac cessory industry, to be sure; but it is ecessary to remember those acces sories that go into the completion of the vehicle before it is ready to be proved ones on the market today loaded on a train for its prospective claim greater ease in use. The autoowner. The manufacturer of the au-tomobile could not conceivably make, n his own shop, every part and fin- larity and while there is yet room shing that goes into the complete car. for improvement, they now give satis-The appurtenances that would fall factory service. There has been an into such a grouping then, form a vital improvement in cross-chains for nonpart of the general accessory industry and must be considered in connection felt want.

In this field there has been a marked and general change—a trend toward stability. It can be best illustrated by citing developments in several of the essential accessory lines. With the increased popularity of closed model cars a greater demand for heavier and higher-grade glass, specially finished has grown up. To meet it the larger manufacturers of glass have turned over considerable portions of their plants. The demand has made large-scale manufacture of the product worth while and strong concerns are

meeting it. Upholsteries a Big Item

Perhaps one of the largest branches of all has been in the manufacture of

Gaping Uppers Banished

No longer need large women wear shoes with gaping uppers. This Coward "Wide Top" eliminates that necessity, for its uppers are cut larger than regular size.

In every way the Coward "Wide Top" is a helpful shoe for heavy women. It is trim looking and comfortable; and the choice leathers and workmanship provide long shoe life and economy.

Offered with or without extension heel. Uppers of varying widths.

Sold Nowhere Else

James S. Coward 260-274 Greenwich Street, New York

the improved rear lights, pointing toward uniformity in this accessory. This is a tendency that promises to be a governing factor in the accessory

field.

Many of the more popular cars have begun this year to appear fitted with hampers designed for use in touring or to carry lunches for shorter trips. Many of the larger trunk manufacturera are offering these pieces of equipment and a wide variety of styles. The rapid growth of the public camping sites in the west and middle west, and gradually moving east, has popularized motor camping and created a demand for a new group of accessories, including portable cooking utensils. cots and tents, all designed to fit here and there about the pleasure car.

In turning out new and improved accessories for use in the closed model automobiles, manufacturers have a wide range among higher-grade accessories, designed both with a visw to utility and healty. The interior of motors are the difficulties of the growing motor traffic on British roads.

wide range among higher-grade accessories, designed both with a view to utility and beauty. The interior of closed cars this year goes even a step farther than the apparent completeness of last year with respect to accessory fittings:
While the increased popularity of

the closed car is resulting in a falling off in the use of motor robes, it is found that the manufacturer of this accessory is adjusting himself and turning to the manufacture of floor coverings for these models. Also the heater for the closed model is becomment of the car.

In the last analysis, if one wishes to make an accurate survey of what the motorist is buying in the line of accessories, a careful look about a large public garage will provide the answer. The average owner, this inspection will reveal, is in the market for ac-cessories that have real value and a nurtenances of showy nature.

TORONTO EXHIBITION

exciting price fluctuations and the introduction of the novelties which usually accompany the latter event. On the other hand the Scottish exhibition provides generally more than one opportunity to examine a popular car, as many of the models are dupli-

cated on the stands of local agents. In the recent exhibition there were examples of the leading cars of Britain, France, Belgium. Italy and the United States. Magnificent specimens of closed cars were staged, and in spite of the movement towards the lighter types, powerful chassis figured in many exhibits. Perhaps the fact that the exhibition was held in mid-winter, in addition to the notorious climate of the country in which it was held, accounted for the increased attention devoted to side screens and hoods, and all-weather equipment generally. Improvements in this direction were a notable feature of the whithities and applied to care of all exhibition, and applied to cars of all powers.

BIG BASKETBALL TOURNEY MONDAY

Kansas City to Hold National Defeat of Britons Tonight Means Amateur Athletic Union Championship

KANSAS CITY, Mo. March 10 NEW YORK, March 10—The third (Special)—The banner basketball game of the international series beevent of the 1923 court season, the tween the United States and Great National Amateur Athletic Union Britain for the J. R. Townsend inter-tournament, will open on the Conven-tion Hall court Monday afternoon, March 12. Kansas City, as in the past March 12. Kansas City, as in the past two years, again will play host to the two years, again will play host to the team will give it the series. Capt. of about 50 candidates are reporting. star quintets of the country. The tournament has been such a big success held under the auspices of the Kansas City Athletic Club that other players won the first two games so cities have not had much chance in

Thirty-two teams, including both court for 1923 honors. By the time Among teams entered are:

College, all of Kansas City; Herbert ever, as two fouls were called against the winners, while but one was scored against them.

Two of the international teams were called against them.

Two of the international teams were in the game together with one of the winners, while but one was scored against them. College, Emporia, Kan.; Los Angeles A. C., Los Angeles, Cal.; Newton A. Teachers' College, Durant, Okla.;

Warrensburg, Mo.
Other teams which are sure entries: Kansas City Athletic Club, Schooleys Kansas City; Tabernacles, Kansas City; Haskell Institute, Lawrence, Kan.; Hillyards, St. Joseph, Mo.

Los Angeles A. C., Southwestern College and the K. C. A. C. will be represented in the tournament here for the third consecutive year. Al-though Kansas City will have only five teams in the big court meet, one round and possibly to the final. That Kansas City Athletic Club, champions of 1921 and runners-up in last year's championship. The Lowe & Camp-bells, who defeated the Blue Diamonds last March in the title battle, will not be represented but three members of the five will be seen in the K. C. A. C. lineup. They are George Williams, captain of the 1923 Blue Diamonds. George Reeves and George Browning, Singer, Francis Hess and Robert Sanders are the old members of

Out-of-town contestants will b given the privilege of practicing on the Convention Hall court tomorrow, ment. More than 12,000 persons attended the 1922 tournament games and the receipts amounted to a little over \$12,000.

Cups will be awarded the team winning the national championship and to the quintets finishing second and Last year the trophy winners were the Lowe & Campbells, K. C. A. C and Southwestern College of Winfield, Kan. Southwestern won third place by defeating the Indianapolis "Y" five.

OVER COLUMBIA, 13-4

Special from Monitor Bureau NEW YORK, March 10-Coach Robert Grasson's Yale University swords men decisively defeated the Columbia University squad at the Morningside gymnasium yesterday afternoon by the foils bouts, 7 to 2, and the sabers with a tally of 4 to 0, the locals breaking even with the épée at 2 to 12.

R. W. Davenport '23 starred for the and Weissmuller is expected to make they were a few days after the train-New Havenites, while Capt. H. F. another world's record. '24, was the outstanding outs out of three and captured both ington evened up matters by taking

a similar score. This makes the fifth victory for Yale this season, and the fourth straight loss for the Blue and White. Cornell University, United States Military University, United States Military Academy, Massachusetts Institute of Technology and Dartmouth College have all lost to the Blue. Columbia has defeated Cornell, but has lost to the University of Pennsylvania, Dart-mouth and the United States Naval Academy, Columbia has been seriously handicapped, however, by the loss of E. P. Barrett '24 and Juan Fuertes '25, both veteran foilsmen. Both these men participated in the meet; but are expected to show considerable improvement for the intercollegiates next month.

SOUTHERN TENNIS IN THE SEMI-FINAL

Dr. P. B. Hawk of Philadelphia, national veteran champion, will play G. C. Shafer of Philadelphia and S. H. Woshell of Boston will meet Douglas Watters of Mulberry, Fla., in the semi-finals in the singles of the southeastern tennis championship tournament this afternoon.

Third-round matches in both the singles and doubles were played yesterday. The summary:

SINGLES

Dr. P. B. Hawk defeated Russell Hunter,
4-6, 6-1, 6-3.
G. C. Shafer defeated S. H. Berg, 6-2. 6-2. S. H. Voshell defeated W. McL. Christie, iglas Watters defeated M. R. Hirsch-6-1, 6-2. DOUBLES

C. Shafer and F. P. Ferguson ded C. S. Rose and George Yenawine, 6-3, 6-1.

U.S. Polo Team to Play Third Game

Possession of Townsend Trophy

Special from Monitor Bureau NEW YORK, March 10-The third national pony polo trophy will take place tonight at the Squadron A R. A. Granniss and his United States easily that they are decided favorites

The New York Athletic Club team. the indoor polo champions of 1922, at college and independent aggregations, the indoor polo champions of 1922, at-will wage a battle on the big hall tempted to concede five goals to the Riding Club, in the semi-final round the entries closed Thursday night,
March 8, leading teams from practically every basketball section of the
country were in tournament line. a equal number of goals, with the final mong teams entered are: score 10 to 5½. The losers gained Eagle Club, Armour Grain, Junior half a point on their handicap, how-

in the game together with one of the substitutes. H. B. Blackwell played No. 2 for the New York A. C. and Newton, Kan.; Southwestern Col- scored four goals for them, while R. lege, Winfield, Kan.; Southwestern A. Granniss played back for the Rid-State Teachers' College, Weatherford, ing Club and confined himself to de-Harbors, Minn.; Union Club, Belvidere, Ill.; Larry Semon, A. C.; Hollywood, Cal.; Carthage College, Carthage, Ill.; Phillips Petroleum, Barthage, Ill.; Phillips Petroleum, Barthage, Ill.; Carthage College, Carthage, Ill.; Phillips Petroleum, Barthage, Ill.; Phillips Petroleum, Bart fensive work. G. C. Sherman, presithage, Ill.; Phillips Petroleum, Bar-compelled to retire during the third tlesville, Okla.; Southeastern State chukker, and C. E. Danforth Jr. replaced him. Sherman scored two goals before his departure.

The goals for the winners were made by Joseph Fahys and W. A. Harriman, who scored three each. Fahys led off with a score right at the opening of the game, within half a minute after the throw-in, and made another less than a minute later. Sherman scored soon afterward, but the balance of the period was scoreless the defensive work of both teams improving as the play continued.

Fouls were called against both

Harriman and Richards for crossing, so that the Riding Club gained one on their handicap. New York A. C. tain of this year's aggregation; F. N. made this up in the second, Blackwell Roach '23, Morrell and Frank Loud scoring twice and Sherman once, while Fahys and Harriman made the goals for the Riding Club. The goals alternated, with Sherman's score coming just as the bell rang.

Blackwell and Harriman were the

corers for the balance of the game with Harriman leading off in each period and Blackwell scoring later. Granniss was penalized for hooking the ball over his pony's shoulder.

The Riding Club also competed in ing, a team of class B players losing to the first Philadelphia City Troop trio, by a score of four to minus ½, while their class C team had better fortune, defeating the "Y" of Squadron A by half a goal, the score being 5½ to 5. W. V. C. Ruxton scored the winning goal just as the bell rang for the end of the contest.

The summary: THE RIDING CLUB Joseph Fahys, No. 1, No. 1, G. C. Sherman, C. E. Danforth, Jr. W. A. Harriman, No. 2, No. 2, H. B. Blackwell R. A. Grannis, back..back, V. D. Richards

Another Record by

HEYDLER BARS BENTON
LOS ANGELES, Cal., March 10—J.
C. Benton, formerly an American Association baseball pitcher, may be eligible to play in organized baseball commissioner, but he is not wanted in the National League, according to J. A. Heydler, president of the National League, now here, who telegraphed to A. C. Herrmann, president of the Cincinnati club, an order barring Benton from the mann, president of the Cincinnati club, an order barring Benton from the league. Heydler said he had never questioned Benton's right to play in organized baseball and that he was glad the pitcher's eligibility had been settled definitely by Commissioner Landis, who announced Benton might join the Reds. However, Heydler stated, the National League would carry out its policy of determining who should or should not play on its clubs.

STANFORD GOLFERS MEET CALIFORNIA

Match Today Is the Fifth One Between the Two Institutions in This Sport

STANFORD UNIVERSITY, Cal., March 3 (Special Correspondence)— The Leland Stanford Junior Univer-sity six-man golf team, which has been practising on near-by links all winter, will meet the University of California golfers on March 10, probably at the Menlo Park Country Club in the fifth match between the two institutions in this sport.

The first of the plays was staged four years ago. Since then California and Stanford have met four times, with the result of two wins for each university. The play on the 10th will decide the present existing tie.

Stanford will present a good team to the state university players when they meet. The Cardinals won their first and only event of the season when they met the Menlo Country Club team two weeks ago and defeated it 9 points to 2. In spite of the right sort of preliminary practice, the Stan-ford golf men showed good playing form, and are said to have about an equal chance with the California men to take the coming tournament.

The Stanford squad of eight men

onsists at present of Capt. C. W. Putnam '23, who showed great promse at Sequoyah a year or two ago, C. C. Hovey '26, S. S. Van Keuren '26,
 D. C. Hines '26, L. W. Miller '23, F. W. Ditzler '26, R. M. Hirschman '24, H. S. Chase '25. The six-man team, which will compete against the California golfers, will be selected from among

Putnam easily bests any of the others on the team. His work even before he came to college, three years

Handicapped as the team is, in not neighborhood.

Hovey went to high school in San Francisco, and was a member of the California Golf Club, where he first learned to wield the sticks. Hovey showed much promise when he appeared on the course last fall that he has steadied down appreciably in his playing in three months.

Van Keuren played some in Los Angeles and in Hollywood before commuch on the links here except in prac-tise, as the varsity has not played many matches since he first arrived. The boy has gone over the Menlo course a few times, and was successful when the team was practising at the San Jose Country Club early autumn; his first trial under playing and contest conditions will come during the California matches.

D. C. Hines, who has played a capi-If he is successful in transferring them to the turf on the 10th, he will honey and Etleman are members of have won a permanent position with Trinity, D. K. Bible of Texas, H. J. the basketball squad.

Trinity, D. K. Bible of Texas, H. J. Stegman of Georgia, M. F. Ahearn of the other five. the other five.
Miller, a senior, probably will match

team, will be out for baseball as soon in Berkeley, the home of the Univer-as possible. his life before coming down here. He intended to go to California before coming to Stanford, and his desire to humble the visitors falls little short of a maximum intensity.

Hirschman has lived in and around San Mateo, and the San Mateo and Menlo clubs for several years. He plays up and down the peninsula south of San Francisco during vacations, and free times, and he has become well acquainted with the local courses. He is at home on the Menlo Club grounds, and will feel particularly at ease when he swings off from the first tee. This is his third year playing for Stanford.

Chase, also, has learned what he knows about the game in this neigh-borhood. The San Jose course is an open book to him, and he has covered the Menlo grounds more than a few times. He has not played with the varsity squad before, however, and he may have to wait for his oppor tunity at outside competition.

California will have such men as Upson, Lyman, Villian and Ede to represent her. The personnel of the California team has not been announced they preferring to wait. Their play ers are older and more experienced, on the whole, than the Cardinals, and the Bears have some advantage because of that.

Although it was in doubt for a long while, it is practically assured that a the last minute, arrangements will be made for use of the Menlo grounds The Stanford players have been prac-ticing there occasionally during the winter, and are desirous of holding the match there.

Putnam has endeavored, but without success, to have a golf course built by the university authorities to care for the increasing number of fans There was an 18-hole course in the old days. It was in fine condition then, but it has grown over with grass and short brush, and cannot today be recognized as such.

There being no opportunity to se-are a local course for his men, the captain has taken the next best step.

Football Cup-Tie Is to Open Big Stadium

London, March 16 THE Wembley Stadium, the largest in the world, will be officially opened in April, when the annual football cup-tie final is pinyed there before the King and the Prince of Wales. The stadium, situated in one of the London suburbs, was started soon after the armistice, but the construction has been halted several

The stadium will seat 196,000 people and is four times the size of the Coliseum at Bome. Its surrounding wall is half a mile in length. The structure will be used in connection with the empire exhibition to be held

and applied for memberships at the Menlo Club. Whether revolving junior memberships will prove to be satisfactory to university and club alike remains to be seen, but pros-pects are fair for the Stanford boys to have the use of that course during

the whole of the coming year.
No definite schedule of matches been made for the spring, for Stanford. It is planned that the team shall meet the University of Southern California, the San Francisco Olympic Club, and the San José Country Club teams. Not even tentative dates have been arranged, however, so no play will be staged before sometime in April, following the California matches

Interest in general in golf has risen considerably since last September. Especially among the students, the faculty having taken a back seat for the time, the revival of the game seems to have meant much. Nearly 100 men are on the hillsides during the afternoon swinging clubs, though

ago, drew notice to him, and he was having its own course, it is generally then considered a comer. At Sequo-yah he was considered to be one of the Menlo Club boosted its stock conthe most careful players in that siderably, and the California match should prove or disprove its mettle.

FOOTBALL SOLONS CONSIDER RULES

NEW YORK, March 10-Members of immediately went into first place and the football rules committee met again now holds an undisputed position on in secret session today to consider the team. He is quite young, but he proposed changes in the rules. The night behind closed doors. No radical changes were proposed, it was said, but considerable time was devoted to ing to college. He has not done very | re-drafting certain rules in order to clarify them. Nothing was given out for publication.

W. Heisman, the new coach at Washington and Jefferson University, urged the adoption of a new type of ball, the main feature of which is a located opposite the lacing, thus distributing the weight to better advantage. This also makes it possible to lace the ball before it is inflated. At yesterday's meeting, over which Chairman E. K. Hall, Dartmouth, presided, were: Walter Camp of Yale,
A. A. Stagg of Chicago, F. W. Moore
of Harvard, W. W. Roper of Princeton, Captain McEwan of West Point, C. W. Savage of Oberlin, J. A. Bab-bitt of Haverford, W. S. Langford of Kansas State Agricultural College, W. R. Okerson of Lehigh and W. N. Morice of Pennsylvania

YALE FOOTBALL ON PAYING BASIS

Only One of 20 Athletic Activities Self-Supporting

NEW HAVEN, Conn., March 9-Of NEW HAVEN, Conn., March 9—Of the 20 activities supervised by the Yale Athletic Association football only is on an entirely self-supporting basis, according to a report made public to-night for the year ending June. 1922. Of the other major sports, baseball came closest to being self-supporting while the crew and track were by far

he most expensive.

Although the association reported eccipts of \$718,599 for the year 1921-22, expenses were almost as large, being \$650,320, leaving net receipts of \$68,279 which were applied to repaying advances made by the university. The association reported a cash balance on

Football receipts amounted to more than \$500,000, of which \$495,671 were gate receipts. Expenses, however, were \$294,380, which included expenses of visiting teams, training, and upkeep of the Bowl. The baseball team reported receipts of \$77.068 and expenses of \$78,096. The hockey and swimming teams were the only other sports in which receipts even approximated expenses. The hockey team reported receipts of \$35,455 and expenses of \$40,509, while the swimming team reported receipts of \$5251 and expenses of \$7719.

\$7391 and expenses of \$13,888, while attackers on all but one occasion. The the tennis team brought in \$2259 and cost \$7348. visitors were considerably disorganized by the rearrangement of their cost \$7348.

OHIO STATE WINS "BIG TEN" TITLE

Defeats Indiana University Team in Conference Wrestling

There were only two falls in the meet. O. M. Radcliffe '23, Indiana's man in the 125-pound class, threw Kenneth Crabb '24 in 5m. 37s., and P. F. Martter '24 of Ohio State threw C. C. Held '23, Indiana, in 11m. 161/28. The summary

NATIONAL CUSHION

disputed game with Layton.
Secretary J. G. Scanlon of Milwaukee is calling a meeting of the executive committee to make a ruling on the game which Denton refused to play with Layton in St. Louis a week ago. The committee will also consider the location of the post-season tournament which is to decide the title between the four players who

finish at the top of the standing.

From all indications, those four players will be Layton, Denton, Otto Reiselt of Philadelphia and R. L. Cannefax of New York. That will make it an intersectional argument. They may compromise and hold the tourney in a neutral city convenient to both extremes, namely Chicago.

Next week P. A. Maupome of Chicago and Harry Wakefield of Milwaukee take to the road. The Chicagoan swings to the far east, starting with Loby Maharen at Management of the Chicago and the Ch with John Hahman at Cleveland, Monday; McCourt at Pittsburgh, Tuesday, and winding with Cannefax. Wednesday, and George Moore at New York, Thursday. Wakefield tackles Clarence Jackson at Detroit, Monday; H. H. Heal at Toledo, Tuesday; Frank Lopez at Cleveland, Wednesday, and E. W. Lookabaugh at Pittsburgh, Thurs-

This week Layton made the best of his opportunities. On Monday he invaded Kansas City to defeat Denton, his keenest rival, 50 to 48 and 50 to 33, took a double bill from Wakefield at Milwaukee on Wednesday, and split with Maupome on Thursday. Lopez, who was also on the road, split pairs of games with each of four con-testants, Lookabaugh, Gillette, Jackson, and Heal. He might as well have stayed at home for all the bearing his trip had on the standing.

Iowa State Wins Wrestling Title

AMES, Ia., March 10 (Special)-Iowa State College wrestling team won clear title to the Western Intercollegiate Wrestling, Gymnastic and Fencing Association mat championship here last night by defeating the University straight association victory of the sea-The Wisconsin grapplers put up

YALE CLINCHES SWIMMING TITLE

Elis Also Make New Intercolle-INTERCOLLEGIATE SWIMMING

Place Unless He Loses Dis-

While it has been conceded for some time that the Yale varsity swimming team would win the championship of the Intercollegiate Swimming Association this winter, it was today an assured fact that such would be the case as the Elis easily defeated the University of Pennsylvania in the Carnegie Pool last night, 43 to 19, thereby giving them seven straight victories. As Princeton, its nearest rival, has lost two games, the Blue may lose its last meet with Columbia and still be sure of the title. When Yale met Columbia Jan. 12, the Elis won 51 to 11, so that there is little chance but what Yale will finish its season with a clean slate. The Yale water-polo team defeated the Red and Blue last night, 54 to 5.

Not content with winning the meet and clinching the title, the Yale swimmers had to make two new world's and one new intercollegiate record in the course of the evening. The new world's records were for the 250-yard and 300-yard relay races and were made as exhibition races while the intercollegiate record was made in the 200-yard breast stroke event.

R. F. Solley '22, C. D. Pratt '22, W. D. Banks '23, D. B. Gauss '22 and Capt. W. L. Jelliffe '23 made up the five-man relay for the 250-yard disthetic Association in the college organization for women in tance and they covered it in 2m. 4s. They previously held the record of 2m. 4 3-5s. The same swimmers with the addition of Freeman Higgins '23,

2m. 58 2-5s. The summary:

WOMEN AT AMES **ENJOY ATHLETICS**

Students Take Part in Some Form of Sports

AMES, Ia., March 3 (Special Correspondence)—From 8 o'clock Monday morning to Saturday evening the women's gymnasium of Jowa State College is in continual use, with classes in physical training during school hours and with competitive school hours and with competitive sports during the late afternoons and evenings. In addition, the swimming pool is almost as busy a place, and during spring and fall many outdoor sports are being played every day on the athletic fields.

Approximately 1000 women—and that means the great majority of the women students in college, take part in some form of physical training or education are required of all fresh man and sophomore women, unless they have had equivalent work in high Last fall 671 were enrolled in these classes.

The sports in which women com pete are divided into two divisions major and minor. The major sports are baseball, basketball, dancing, gymnastics, hockey, swimming, tennis, track and rifle shooting. The minor are volley ball, cage ball, handball, skating, horseback riding, hiking, archery, quoits and golf.

Because the department of physical education belongs to the Athletic Conference of American College Women no intercollegiate competition is pro-vided for women athletes here. As a result intramural competition is developed to a high state, and the sports closely linked with the instructional A system of awards is in vogue which gives recognition to athletic

prowess.
The Women's Athletic Association is terested in athletics. Any woman in college is eligible to belong to the association as an associate member. To made up the 300-yard relay and they covered the distance in 2m. 30 2-5s., breaking their own former record of 2m. 31 2-5s. 200-yard breast stroke record when he won that event in 2m. 57 2-5s., breaking his own previous record of 2m. 58 2-5s. Last Game for the Western Champion

Nearly 1000 Iowa State College Play Superior Hockey to Cleveland and Win, 3 to 0

UNITED STATES AMATEUR HOCKEY (Western Division)

CLEVELAND, O., March 10 (Special)—The St. Paul Athletic Club, western division champion of the United States Amateur Hockey Assoiation, will play its final game of the scheduled season, before the cham-pionship series with the eastern winner, here tonight, with the Cleveland Hockey Club, runner-up in the standing. Should Cleveland lose tonight it will slip into a tie with the Eveleth Hockey Club now holding third place. St. Paul conclusively proved its claim to the western championship here, last night by defeating the Blues, 3 to 0.

While the entire St. Paul team showed a greater dash and all around superiority over Cleveland, it was D. M. Breen, right defense man for the Minnesotans, who proved the big stumbling block to Cleveland, his excellent checking more than once end ing a Cleveland rush for the St. Paul F. X. Goheen, the visitor's star wing-man, shared honors with Breen. while Elliott outplayed Turner as a goal tender.

The Ruralist and His Problems

a life time to discover which quinces are best adapted to their soil and

etal obstacles to more general plant-ing of quinces, and what means can

be taken to produce a superior quince that will win its way into the hearts

of even the commercialists. For surely quince preserves is worth per-

AT ABOUT this time of the year, when the average housewife be-bins to have some misgivings about the lasting qualities of her remaining stocks of preserves, it is seasonal to remind the American farmer and all who have grounds for a fruit garden of the unreasonable neglect to which so fine a preserving crop as Well, let some of our modern country gentlemen get interested in quinces. Professor Sears can give information enough to start them off, and then they will have a study for

which so fine a preserving crop as the quince is generally subjected.

The United States census sheets for fruits find it unnecessary even to mention the quince crop. And many a treatise on orcharding that pretends to be fairly exhaustive forgets this de-lightful fruit. One is led to believe that quince culture was more general at least in the eastern states a generation or two ago, although there seem to be no corroborating statistics on not remember his grandmother's preserves closet when quince marmalade or quince preserve is suggested? The Ruralist has good authority for

assigning the quince to the highest position in the fruit world, at least among the fruits for preserving. No one can take a census of the grandmothers in a country community on the question of the most desirable of preserves without getting an over-whelming return for the quince. Else it is a benighted community which knows not this noble little tree of delicate pink-white blossoms which produce the fruit of such surpassing quality when made into preserves. The champions of the strawberry, the peach or the pear may take this as a challenge if they wish, but they im-mediately lay themselves open to the charge of ignorance of what is real good quince preserves, or the even more invidious assumption that they never had a New England grand-

cial)—The Duluth Hockey Club will Massachusetts Agricultural, College endeavor again to tie the Pittsburgh rises to assert the claims of the quince Hockey Club in the standing of the to the attention of the suburban gar-western division of the United States dener or the orchardist. The quince to the attention of the suburban gar- grated Amateur Hockey Association in the can be grown on almost any soil, he final game of the season here tonight, argues, and supports his contention by citing the multitude of neglected quince orchards that have produced abundantly under the most atrocious and systematic neglect.

In a little leaflet on quince culture that the Massachusetts Agricultural College is now publishing. Professor Sears calls attention to the ease of cultivation and to the very moderate requirements of the quince. A dozen quince trees can be planted in a plot of ground 50 feet square and the plot still be used for garden space. deed the place of the quince is in the garden, and the countryman who hasn't a fruit garden to supply his household with berries and tree fruits in season, as well as green peas and spinach, has not really started his rural education.

The quince has few enemies. It is claimed that even deer do not eat its leaves. Its symmetry and the beauty of its blossoms fit it ideally for the garden close to the house. The quince is ornamental and utilitarian in the a tree, rarely reaching a height of 15 feet and being always amenable to trimming to the shape of the gardener's fance.

dent assistants. Over 100 girls passed the swimming test last quarter To the decision. host who treats his guests to quince

noisseur. A good thing it is for our national R. C. Probst 25 in a lively bout. While life too, this spirit of the amateur that Iowa was clearly defeated, Nebraska has been responsible for the development of so many fine varieties of fruit in this country. There is a great deal less amateur interest in pomology HAMILTON, Bermuda, March 9—than there was 50 years ago. With Miss Mayme MacDonald of Seattle, Wash., today won the Bermuda women's tennis championship, defeating Miss Gladys Hutchins, Bermuda, tions in colleges of agriculture on the 6—4, 6—4. MINNESOTA WINS TWO DUAL MEETS

Defeats Iowa at Swimming and Chicago at Gymnastics

MINNEAPOLIS, Minn., March 10 (Special)-The University of Minnesots was victor over two Intercolleglate Conference Athletic Associati rivals here last night, when it closed its local swimming and gymnastic seasons, defeating the universities of Iowa and Chicago, respectively.

The swimming victory was a onesided event and was attended by the climatic range, which varieties make the best preserves, what are the varibreaking of one Conference record and the equaling of another. The final score was Minnesota 54, Iowa 21. The result was hardly in doubt from the start, the Gophers taking six firsts to two for the visitors. The record-breaking event occurred in the 160-yard relay, which was won by Minnepetuating. Our civilization and cul-ture could only be the loser for losing sota in 1m. 19 2-5s. The best previous time in the "Big Ten" Conference was the culture of the quince.

Concerning the preserving of quinces, Professor Sears writes: "As quinces are of such a strong flavor,

quinces, Professor Sears writes: "As m. 20 3-5s., held by Wisconsin.

The prettiest race of the evening flavor, few of them will make a large quantity of delicious confection by using apple in combination with them. The quinces should be cooked in weight and the fine time of 19 3-5s. before adding sugar, for if sugar is by Capt. Johnson Bennett '24, Wiscon-added when the cooking begins, the quinces will become hard."

He recommands several recipes of which he has "tried the results and the sevent, far excelling anything the known the sevent and the sevent He recommands several recipes of which he has "tried the results and Gophers could show, plunging the knows they are good." They are: length of the six-foot tank twice in quinces and cook until soft in enough. Quince Marmalade—Pare and core around 21s. H. H. Hanft '25 was a quinces and cook until soft in enough Minnesota surprise in the backstroke water to cover them. Then rub through a sieve and add three-quarters time and by a good margin. He rethe weight of sugar. Cook 20 minutes and put into jelly glasses.

Dinmore '23, another star swimmer, last Then rub events, winning the class for the first

Quince Jelly—Put parings and imperfect quinces into a preserving kettle with one quart of water to two of the fruit. Cook slowly for about of the fruit. Cook slowly for about two hours. Then strain, measure fashioned farm fruit garden.

But the quince is not without its able and authoritative champions even in his commercial age. Fred C. Sears, of Kansas and Nova Scotia, now occupying the chair of pomology—and a worthy academic post it is—in the Massachusetts Agricultural, College rises to assert the claims of the quince when sugar is dissolved add the stothe attention of the suburban gargrated quince and cook 20 minutes. took four firsts in the six events. All Turn into jelly glasses.

Catalonia and Independence

To the Editor of The Christian Science Monitor:

I regret to see in your issue of Feb. 28 an article, "Catalonia Wants Freedom From Spanish Government." dated Madrid, Feb. 5 (special correspondence).

I was brought up in Catalonia and never left Barcelona until I was 17 years old. If you were to take a plebiscite there, I doubt if you could fine one person in a thousand who wished to separate from Spain.

The quince is essentially a fruit for the amateur garden. Commercially it has never proved popular. Orchard-

Special from Monitor Bureau

London, Feb. 16 AN ARTIST who is often disconcerting is Mr. C. W. R. Nevinson, who is showing a large selection of his etchings at the Leicester Galleries. His career as a painter, so meteoric and at times violent, has caused more discussion perhaps than caused more discussion perhaps than any other contemporary Facility. In the more literal scenes of peasant. any other contemporary English painter's. Although some time ago

Mr. Nevinson from time to time there artist obtains his result. is over all his work the strength of a fundamental designer. This it is that gives everything he does the stamp of individuality, and is no less apparent at the present exhibition of his etchings. Dating from 1910 onward, they illustrate the phases Mr. Nevinson had passed through as a painter. In those early plates where cubism perhaps lurks the sense of design is easier to grasp, but it is no less there in the very fine and most recent "Romney Marsh" and "Sussex Downs." Moreover, in these as in all those plates of scenes in London, Paris, and New York, there is a marvelous "place" atmosphere.

Edmund Blampied, A. R. E. Just as we have in Mr. Nevinson a painter with a future as an etcher. so we have in Mr. Edmund Blampied an etcher with promise as a painter, at the same gallery is held the first show of his paintings.

And now the first fruits of his efforts in a new medium — paint — are in the shown. Matthew Maris, the Barbizon Gallery.

School, Millet and Daumier are the influences which guide the vision of

changing scene before him.

In the more literal scenes of peasan painter's. Although some time ago he disclaimed any attachment to the many groups in the modern movement, it must always remain as a definite fact that his work has rarely been free from the influence of the various "ists" and "isms."

But whatever the style affected by Mr. Nevinson from time to time there.

The National Gallery

Occupied by a Government department during the war, Rooms IX and X of the Najonal Gallery have just been opened again to the public. It is good to see them hung again with old favorites of the Dutch School, amongst which will be found several recent gifts and bequests. Amongst these the most important is the large "Christ Before Pilate," by Honthorst (1590-1656), which until recently was in the Stafford House collection. It is remarkable in being a sort of pre-cursor to the dramatic manner of Rembrandt, for this master was still a boy when it was painted.

Another important new picture is of the School of Alkmaar (1500), representing St. Lawrence and his kindly acts. Dominating Room X is Rembrandt's portrait of himself, and several dark-toned pictures of his contrasted by some of the most brilliant examples of Dutch open air painting in the possession of the National

merce a large collection of paintings by Andree Moch is at present being shown at the Anderson Galleries. It is the work of an ambitious young lady from the Argentine who with most commendable courage has gone forth, armed with her painting kit, to grapple with mountain ranges (and from a moving train at that), glaciers, primeval forests, rioting South American rose vines, and pageantry of the four seasons, the open sea, and the men and women who are found in the ac tivities of two continents. Her studio is in Buenos Aires and somewhere near by she has a most bewildering garden. Moreover, like all good South Americans, she knows her Paris and has painted and exhibited there with much

success, it is said. But after all, despite the kinship of these Latin peoples with the great El Greco and the princely Velásquez, despite their proud heritage from the fabled splendor of an Aztec civilization, or their process. tion, or their present possession of prodigious natural wealth and beauty. Zorn, its artist son or daughter who will plant its standard in the front ranks. Miss Moch succeeds best as landscapist, despite her insistence on the redness of the rose or the theatrically disposed foliage in her gardens. Her large canvas of a forest of eucalyptus trees is handsomely arranged and carried through with a ranged and carried through with a Robert Atkins as producer, is there

Somehow the enjoyment of the etchings and litho-graphs which Sidney Phillips has arranged at this, the Sardeau, gallery, seemed immeasurably enhanced by the tasteful surroundings and the cheerful blaze of the open fire. George O. has appeared in many exhibitions this he is current as well at the Sterner Gallery with his Stevensonian water colors-grows more interesting at each encounter. A certain pica-resque flavor obtains in these pictorial tales of southern climes where life rambles on in picturesque indifference to daily exigencies. Besides his line which is occasionally varied with color, he shows some more of his water colors; their strength and accuracy of statement recall similar by Winslow Homer yet in a much lighter, more whimsical mood. His rendering of two dusky washer women beside a stream is a harmony in browns and a pithy, racy commen-tary on West Indian ways to boot. Mr. Hopper is something of a newcomer this season whose etched work promises well for the future. Already he is to be noticed for the dramatic way that he plays with bold masses of light and shade and for the human interest that his figure pieces evoke.

Alice Judson

Paintings by Alice Judson are at the Hill Galleries. She is a landscapist Mr. Robert Atkins was effectively ironwith an eye for the poetical and picical, in a no doubt deliberately meloturesque. Her performance is on a dramatic rendering of York's son, par with her cutlook on nature, rather Richard Crookback. Miss Esther more lively perhaps in the water colors than her oil paintings. And if the demands put upon her power of portraying the gentler aspect of countryside and seashore are in a way exacting, she, at any rate, invests her work with a continuously fresh touch and a consistently harmonious han-

The Dudensing Galleries are sponsoring the work of a young Spanish painter, Raphael Sala, whose portraits and landscapes are colorful, eagerly modern affairs. He deals with ele-mental facts in his landscapes and contrives to make arresting patterns therefrom. In the portraits there is evidenced a considerable authority in deft characterization.

"Henry VI" Revived in London

Special from Monitor Bureau

London, Feb. 23 TEVER, since Elizabethan days, has the "History of Henry VI," usually credited to William Shakespeare, been at all popular upon the British stage. Edmund Kean did Part I, in 1817, and there have been occasional later revivals of one or other South America has yet to produce its of the three plays that make up the agement for so courageous, sound, and trilogy; but, excepting only a per- thoroughly interesting a production formance by the Benson company, at as this. the Shakespeare Memorial Theater, Stratford-on-Avon, about 1906, this chronicle-drama, as a whole, has not been seen in London since James terest and importance.

drawing room dimensions, of pale to maintain their popularity is easily accounted for. They are too epi-sodical, they deal with a confused and chaotic period of English historythat, even today, is almost unknown to the majority of Englishmen—and they treat of a time when British national fortunes and national morality were alike at their lowest ebb, when the last of the turbulent English Hart and Edward Hopper are Mr. Phil- barons, whether wearing the red rose lips' initial exhibitors. Mr. Hart, who or the white, were showing themselves so selfish, so factious and so false, so prompt to sacrifice friend or country to immediate personal advantage, that one cannot easily sympathize with any single character in the plays, unless it be with the virtuous, though weak and irresolute king. Even that lovely figure, Joan of Arc, can be made acceptable here only with the help of the blue pencil, which Mr. Atkins has

wisely employed. A play such as this, with its fights and its factions, its tauntings, and its treacheries, its murders and malignant humors, can be successfully carried off only by spirited and virile acting, which it certainly gets at the Old Vic. The company, realizing that here was neither subtlety nor beauty of character, upon which to work, went bravely for what they could make the most of-and with complete success. No space remains in which to mention more than a few of the many parts, but I note that Mr. Wilfrid Walter was impressive, first as Gloucester. and then as Jack Cade; that Mr. Rupert Harvey bore himself with fine dignity as the Duke of York; and that tory, Margaret of Anjou, while Miss

Music News and Reviews

Boston Orchestra Plays

Liszt's "Faust" Symphony Yesterday afternoon the Boston Symphony Orchestra, Pierre Monteux, conductor, gave its eighteenth concert in Symphony Hall. The program: Handel, Concerto Grosso No. 5 in D major. Liszt, "Faust" Symphony.

The Harvard Glee Club sang the choral part of the symphony and Arthur Hackett sang the tenor solos. In 1863 Edward FitzGerald wrote: "Handel was a good old pagan at heart, and, till he had to yield to the Fashionable Piety of England, stuck to Opera and Cantatas, where he could revel and plunge and froic without being tied down to Orthodoxy"; and some time after that Samuel Butler, the author of "Erewhon" (whose en-thusiasm for the composer sometimes led him into rather extravagant statements), says quite justly in "Alps and Sanctuaries": It is as a poet, a sym-pathizer with and renderer of all es-tates and conditions, whether of men or things, rather than as a mere musician that Handel reigns supreme... There has been no one to touch Handel as an observer of all that was observable, a lover of all that was lovable, a hater of all that was hateable, and, therefore, as a poet." Who could have listened to the concerto as played yester-day afternoon and not agree? The touch of genius is on every page. The playing was worthy of the music. It was by turns warmly expressive, noble, graceful and gay, one of the finest in-terpretations which Mr. Monteux and the orchestra have given this season. After the concerto came Liszt's "Faust" Symphony, music as great as the preceding. It is impossible to hear any composition by Liszt without reflecting on the immense debt which modern music owes to him, yet it is not for this reason that the "Faust" Symphony appeals. Among all the works produced during the heyday of the romantic movement it stands alone as the most inspired embodi-ment of those theories which revolutionized the art of music. In Mr. onteux it found a sympathetic and understanding interpreter. It is a piece which might easily be made display of personal virtuosity. Not so with Mr. Monteux, however, whose sole aim was to bring the music to adequate and expressive performance. The Glee Club sang the few measures allotted to it acceptably. Mr. Hackett's these few short phrases it was possible to sense his well rounded musicianship, his deep musical un-

nant, they blended remarkably well.
Then came examples demonstrating fitness for solo work. The performance of Vitali's Chaconne by Albert Sammons was a triumph for the Vincent violin, which sounded absolutely at home in the noble classic style. The "tessitura" (to borrow a vocal term) is extremely good, and the tone binds well throughout all the registers. The viola by Vincent was less characteristic, approximating too closely to violin tone, but nevertheless attractive, and the cello possessed a charm even if it lacked depth and weight of sound upon the C string. Evidently Vincent is at his very best in his violins.

As a final test, screens were placed across the stage and Albert Sammons, concealed behind them, played the same solo upon a Vincent and a genulae Stradivarius violin. The audience was asked to guess which was which. People were in a dilemma. On the

New Work by Armstrong Gibbs

Special from Monitor Bureau LONDON, Feb. 23 - A short new choral work, "Before Dawn," by Armstrong Gibbs, was performed by the Westminster Choral Society at its concert at Queen's Hall on Feb. 6.

The composer had the advantage of artistry and a charming freshness of décor. Needless to say, the work, a singularly lovely poem by Walter de from a musical standpoint, has re-tained all its bright youthfulness, in-lating into choral and orchestral tone some aspects of the poet's thought. But the poet draws far ahead of him in vision. The music for the most part is no more illuminant than a transparent shadow, written in the simplest style of choral art, the accompaniment kept very frugal, save at the unfortunate point when the word "Lo" is surrounded by an unwanted tremolo. Everything seemed understated and flat as an old fresco until the last line, when, on the words
"Spring is here" the sudden flood of
brightness brought by the "Tierce de
Picardie" showed that the composer
had deliberately worked toward this effect from the very beginning.
M. M. S.

Theatrical Notes

In San Antonio, Tex., was opened on March 3, the new \$1,000,000 Palace Theater, said by Louis Santikos, its owner, to rank among the finest mo-tion picture playhouses in the south. A 30-piece orchestra is under the direction of Don Felice of Chicago. Mayor Orlando B. Black spoke on the

opening night.

"The House," by Glen MacDonough, will be produced soon by Mack Hilliard with a cast including Anne Morrison, John Marstens, Florence Johns, Sherman Wade, John Keefe and Walter

Lawrence.

Jerome Patrick will have the leading male rôle in "Zander the Great," in which Alice Brady will be starred.

SPECULATORS CAUSE WHEAT

Bullish Factors in All Grains Confined to the West-Corn in East

Special from Monitor Bureau of corn and oats for May were the only grain futures that failed to record fractional advances for the week's operations on the Chicago Board of Trade. May wheat showed the greatest rise, due to a battle between hedgers and speculators. Cash interests with large stocks of wheat at the seaboard found little demand,

but their hedges in the market here were favored by speculators.

Trading as a whole was predicated upon the Government estimate of farm upon the Government estimate of farm reserves, and when it was issued the market disregarded it. The figures were anticipated by the statistics announced by Snow, which in turn had been accurately forecast and discounted. While at first glance the reserves were somewhat larger than expected, the trade put a mildly bullish interpretation upon the statements.

According to one market authority, the bullish factors in all grains are confined to the west. The east is said to be well supplied with various grains for which there is little sale. Much corn has been shipped east recently and quantities of it are still unloaded.

must find consumption. In view of its fine quality, however, its disposal is not expected to provide a great been repor problem. Country feeders are buying merchants. corn at prices that are not met by quotations.

In Illinois, especially, elevators are

as follows:

Cattle—Receipts, 3000; active on all killing classes; killing quality beef steers, rather plain; top matured steers, \$9,50; best long yearings, \$9,35; bulk, \$7,7569; several loads, \$9,1069,75; beef heifers, 10c to 15c higher and spots more; several loads 700 to 900-pound heifers, \$7,3568; stockers and feeders, scarce, steady; demand fairly active for kinds suitable for spring grazing.

Hogs—Receipts, 35,000; market 10c to 20c higher; closed dull on butchers; bulk 140 to 220-pound averages, \$8,2568,40; few \$8,45; top, \$8,50; bulk 250 to 325-pound butchers, \$7,9568,10; packing sows, around \$7,2567,50; desirable pigs, mostly \$7,2567,75; few \$8; estimated holdover, 19,000.

\$1.297.15, 1ew \$5, catalant 10,000; 10,000.

Sheep—Receipts, 10,000; choice handy weight lambs strong, other classes steady; top wooled lambs, \$15.25 to packers; bulk, fat wooled lambs, \$15.25 to packers; bulk, fat wooled lambs, \$14.50@15. clipped kinds, mostly \$11.90@12.10; fall clipped, up to \$12.75; heavy clipped lambs, \$9.50 @10.50; one load 92-pound clipped wethers, \$7.75; good 109-pound, \$8.25; two loads desirable 64-pound feeding and shearing lambs, \$15 on country account.

Northwestern Bell Telephone for the year ended Dec. 31, 1922, reports an operating revenue of \$21,937,175 and a net income available for dividends of \$2,506,891, equal to \$6.18 a share on \$42,156,000 stock outstanding. This compares with operating revenue of \$20,737,020 in 1921 and net income of \$1,786,687, or \$4.24 a share.

RAY CONSOLIDATED COPPER

Report of the Ray Consolidated Copper Company for the three months ended Dec. 31, 1922, shows an operating profit of \$165,537, which after miscellaneous income left final profit of \$201,902. This compares with an operating profit of \$22,095 and a final profit of \$57,809 in the three months ended Sept. 36, 1922.

BRITISH BUDGET SURPLUS LIKELY

MARKET RISE Abolition of Corporation Profits Tax Is Recommended

British budget receipts for the three weeks ended February 24 exceeded expenditures by £57,542,000 according to a cable to the United States Department of Commerce from Commercial Attaché Walter S. Tower. It is now CHICAGO, Ill., March 10-Deliveries generally agreed that the fiscal year will show a substantial budget sur-plus. Some estimates place this as high as £50,000,000.

Great importance is attached to the Great importance is attached to the representation of the Federation of British Industries which has urged the Chancellor of the Exchequer to make the following tax reductions in the interest of Business: Abolition of the Corporation Profits Tax; substantial reduction in the rate of Income Tax; some remission of indirect taxation. The coal trade is enjoying at least

a temporary boom. The majority of collieries are reported as booked full several weeks in advance. Prices of most export grades for March delivery are 3 shillings to 5 shillings per ton higher than in January. In-

The iron and steel industry has been stimulated during February by the difficulties affecting deliveries of Continental producers. Prices are firm to higher. Some grades of pig ron are up 10 to 20 shillings during the month. The export trade shows an improved

and quantities of it are still unloaded.

In Chicago there is stored a large amount of winter shelled corn which ing prices. Wool combing charges at Bradford have been reduced about 10 per cent. Additional failures have been reported among piece goods

MARKET OPINIONS

Schirmer, Atherton & Co., Boston: Is it not a fair presumption, that in the great rise which security values at the beginning of the present crop movement. There was a break in corn Friday, with prices running into stop-loss orders on the way down.

Schirmer, Atherton & Co., Boston: Is it not a fair presumption, that in the great rise which security values have seen since Aug. 24, 1921—the low point—that practically all, or nearly all that we see today in the way of prosperity has been discounted? We do not wish to be understood as definitely taking a beauty register. nitely taking a bear position on the market yet, but we do feel that it is a time for conservatism, and that it will be as unwise to be over-enthusiastic on the bull side at this level as it was to be too pessimistic 19 months

Tucker, Bartholomew & Co., Boston:
A study of the fundamentals which govern the rise and fall of security prices leads to the conclusion that the present market will see higher prices in coming months. But when the top is reached, no one will know that it has been reached. No method has yet been invented by which the latent buying power of the public can be gauged with any degree of accuracy. When the top is reached, it will find many of the shrewdest and most capable speculators top is reached, it will find many of the shrewdest and most capable speculators carrying large lines of stocks, and it will find board-room sentiment ex-tremely bullish and unable to see any

Elmer H. Bright & Co., Boston: In the 12 business days following the advance in the discount rate by the New York and the Boston federal reserve banks, the average price of 40 bonds has declined a little more than 1½ points. This does not seem like a marked drop, but, considering that the entire advance from the low custations. entire advance from the low quotations of 1920 to the high quotations of 1922, spanning a period of two years and three months, was only 17 points, we think it well to take cognizance of what has occurred within the last fortnight in the bond market.

continuation of earning power recently action of earning power recently action of earning power recently action of earning power recently proximately 3,100,000, with an annual attained by others would, at least, warrant materially higher valuations. This brings us to the second question as to how long this period is likely to last. The ending of a period of activity and around 5,000,000 pounds of mohair.

The ranges had an abundance of sharp advance in money rates and days. stringency.

Tucker, Anthony & Co., New York: We anticipate a further gradual ad-vance, featured by steels, oils, coppers, sugars, papers, and to a lesser degree by motors, tires and ralls.

Richardson Hill & Co., Boston: We recommend the purchase of Atchison. Illinois Central, New York Central and Pere Marquette. American Locomotive in view of its remarkable earnings report seems destined for higher levels. White Motors and Studebaker are attractive to the process. ractive among the motor issues.

F. L. Miliken & Co., Boston: Speculathe common the continues broad in character with a long string of million-share days already behind us and the pace tending to quicken rather than slacken. So far, however, bullish enthusiasm has not run wholly wild.

J. S. Bache & Co., New York: It is possible, in fact, quite probable, that we are in a period of reaction which has thus far lasted two days and may go further next week. From Monday morning to Friday evening we had a turnover of 6,000,000 shares. The average level of both industrials and rails is lower than it has been in a week. is lower than it has been in a week

Hornblower & Weeks, Boston: A ral lying tendency developed before the close yesterday, as expected, and we look for it to be extended today. The market has had its customary weekly reaction without in any instance breaking normal limits among important stocks.

GOLD SHIPMENTS TO INDIA NEW YORK, March 10—Gold with-drawals aggregating \$1,911,000 for ship-ment to India were in the strong boxes of the Majestic, sailing today for Eu-rope. The gold is being forwarded to complete obligations due merchants in India for mercantile balances.

SWANSEA HAS TRADE BOOM LONDON, March 10—Swansea's trade boom continues, the total trade for January and February aggregating 1,029,000 tons, compared with 790,000 for the corresponding period in 1922. Coal shipments increased 150,000 tons, tinplate 9000, and oil 43,000.

FRENCH BAILWAYS PROGRAM LONDON, March 10—The program of extension on the French railway sys-tem in 1923 calls for 270,000,000 francs for electrification and 775,000,000 francs for other improvements.

Edward T. Whiter

DWARD T. WHITER, who has recently been appointed acting vicepresident, Northwestern Region of the Pennsylvania Railroad, with offices at Chicago, is a product of the public-schools of Steubenville, O. At 17 he entered the service of the Pittsburgh, Cincinnati, Chicago & St. Louis Railway Company as a telegraph operator, and within four years was advanced to train dispatcher.

In 1899 he was transferred to assistant trainmaster of the Eastern Division of the Pennsylvania Company, and the following year stepped into the higher position of trainmaster. Mr. Whiter was promoted to superintendent of the Eastern Division in 1903, and 10 years later was appointed general superintendent on the Northwest System of the Pennsylvania lines west of Pittsburgh.

On July 1, 1915, he was appointed by the Board of Directors to the then newly created position of assistant general manager of the lines west of

CUSTOMS RULINGS

NEW YORK, March 10 (Special)-It an interesting and rather important decision by the Board of United States General Appraisers, overruling protests of the Textile Alliance, Inc., it is held that the invoices and entries covering shipments of dyes to this country, having been made in the currency of the country of exportation, i.e., German marks, and conversion having been made at the rate shown by the Federal Reserve Bank, reports as of the date of the certification of the invoices, the Collector of Customs was correct in adopting such rate as the one to be used in the conversion of the currency. The importers expressed in the entries the dutiable value in United States dollars in which money it was claimed. the dutiable value in United States dollars in which money, it was claimed, the goods were purchased. The contentions before the Customs Board were that the goods should have been considered as entered in dollars and should have been appraised in dollars rather than in marks. Judge Waite writes a lengthy opinion of the subject denying the imporface's claim.

lengthy opinion of the subject denying the imporer's claim.

The tariff rate on coal tar colors is reduced in rulings by the board sustaining protests of Hensel, Bruckmann & Lorbacher, and H. R. Ackerman. Imported dyes, obtained from alizarin or anthracene, were assessed in some instances at 30 per cent and 4 cents a pound, and in other instances, at 30 per cent and 5 cents a pound, under Group 8, Title V, Section 501, act of Sept. 8, 1916. In an opinion by Judge Brown, the board finds that only the 30 per cent ad valorem rate should have 30 per cent ad valorem rate should have

EXCESS PROFITS ON WOOL COLLECTED

BY GOVERNMENT WASHINGTON, March 10—The Department of Agriculture has collected a total of \$662,477 in excess profits of dealers on the 1918 wool clip and distributed \$360,365 of this amount to quirements for the urban population more than 100,000 wool growers with a trend toward further substi-

throughout the country.
In making this announcement today, the Department said several recent court decisions upholding the regulations of the War Industries Board under which the collections are being made had expedited the work.

DIVIDENDS

Fairbanks, Morse & Co. declared a quarterly dividend of \$1 on the common, payable March 31 to stock of record March 16. In the previous quarter an extra dividend of 75 cents and the regular quarterly dividend of 75 cents was declared.

Fidelity Trust Company of Baltimore deciared a 4½ per cent quarterly dividend, placing the stock on 18 per cent annual basis, compared with the former 16 per cent basis. The dividend is payable March 31 to stock of record March 24. Mississippi River Power Company declared a quarterly dividend of \$1.50 a share on the preferred stock, payable April 2 to holders of record March 15.

MacArthur Chocrete Pile & Foundation Company declared a semannual dividend of \$4 a share on the preferred stock, payable April 1 to stock of record March 15.

Pittsburgh Plate, Glass Company de-

stock, payable April 1 to stock of record March 15.
Pittsburgh Plate. Glass Company declared the regular quarterly dividend of 2 per cent, payable April 2 to stock of record March 15.
The Philadelphia Company declared the regular quarterly dividend of 75 cents a share on the common stock, payable April 30 to stock of record April 2.
Directors of the American Hardware Corporation declared a quarterly dividend of 3 per cent, payable April 1 to stock of record March 15. This is an increase in the annual rate from a 10 per cent to a 12 per cent basis.
Pacific Telephone & Telegraph Company declared the regular quarterly \$1.50 preferred dividend, payable April 16 to stock of record March 31.

ENGLISH COTTON INDUSTRY LONDON, March 10 (Cable)—A large contract for a cotton combing plant has been placed with Continental makers ACTIVE AND by Lancashire spinners at a price, says the Manchester Guardian, "a long way below Lancashire makers," for what is

> machinery. SOUTH AMERICAN COPPER

LONDON, March 10-At an extra-rdinary general meeting of the South American Copper Syndicate a resolution was passed increasing the capital to £100,000 by the issue of 250,000 2s-shares. The chairman of the company said that South America was a safe field for investment in copper.

WHEAT EXPORTS TO EUROPE SHOW LARGE INCREASE

Corn Also in Greater Demand Abroad and Higher Prices Are Expected

Shipments of wheat and flour to Europe from the beginning of the current cereal year to Feb. 10, 1923, were

rent cereal year to Feb. 10, 1923, were
323,854,000 bushels, compared with
265,188,000 bushels in 1921.

This volume confirms the earlier estimate that in order to meet the requirements Europe must import at least 640,000,000 bushels of wheat during the current year, says Airred P.
Dennis, special representative of the United States Department of Commerce, in a cable dispatch from Vienna.

Higher Corn Prices Expected Grain imports into the United Kingdom for five months to Feb. 1, 1923, indicate that the volume of wheat imports, as compared with the corresponding period in 1921-22, is up by 9 per cent; corn by 14 per cent; and

oats by 19 per cent; and oats by 19 per cent.

The imports of barley remained unchanged. In view of the smaller American corn crop, the reduced estimate of the Argentine harvest and the poor quality of the Danubian stocks, traders are inclined to believe that the prices of corn will lieve that the prices of corn will

Reports from Germany show no amelioration in the foodstuffs situation in that country. The requisition prices of home grain are one-third below those of the free market level. The indifferent success experienced in collecting the quotas of native grain augments the import retution of corn and barley for wheat.

Export Duty Reduced

The export duty on corn from Jugoslavia has been reduced from 120 to 40 dinars per 100 kilos (\$1.17 to 39 cents per 220 pounds). It is estimated that 10,000,000 bushels will be released for export. The Turkish duty on wheat has been reduced to 30 piasters per 100 kilos (per 220 pounds). The suspension of wheat imports into Spain promises to be prolonged indefinitely. A state grain monopoly has been established in Norway. Grecian supplies of imported wheat are reported to be 120,000 tons, with monthly requirements estimated at 50,000 tons.

The opinion is expressed that unless Rumania increases the normal spring sowings, the country will have no ex-portable surplus of either wheat or rye from the next harvest.

HARTMAN CORPORATION SALES Hartman Corporation February sales were \$1,571,379, an increase of \$542,196 over the corresponding month of 1922.

Notice of Redemption of INTERNATIONAL CEMENT CORPORATION Five-Year Eight per cent. Convertible Gold Notes

Notice is hereby given that, pursuant to the provisions of the Trust Agreement dated June 1, 1921, made by International Cement Corporation (a Maine Corporation) to The Equitable Trust Company of New York, Trustee, to provide for an authorized issue of \$1,500,000 aggregate face amount of Five-Year Eight Per Cent. Convertible Gold Notes of said International Cement Corporation, all the notes issued under said Trust Agreement and now outstanding have been called for redemption and will be redeemed on March 20, 1923, at the price of 110% of the face amount thereof together with accrued interest at the principal office of said The Equitable Trust Company of New York, Trustee, No. \$27 Wall Street.

GERMANY'S GOLD LOAN AND VALUE OF

AMERICAN DOLLAR BERLIN, March 10 (By The Associated Press)—The American dollar is Ka ciated Press)—The American dollar is reckoned as the equivalent of 1.5046 Kan grammes of fine gold in the prospectus for Germany's new \$50,000,000 international gold loan, as represented by the issue of Federal Treasury bills to that amount.

It is interesting to note that this number of grammes is convertible into 23.21978 Troy grains of fine gold, whereas the gold dollar formerly coined by the United States was decoined by the United States was defined as the equal of 25.8 Troy grains, Mor which nine-tenths, or 23.22 grains M were fine gold.

The prospectus specifies the dol-

lar's gold value in view of the fact that the bills are redeemable on April 15, 1926, at 120 per cent of their face Malue, either in Reichsbank checks on M New York, or in gold, at the discretion of the Reichsbank. Since the payments on the bills may be made in certain other highly valued foreign currencies, the relation of these to the dollar is also definitely fixed.

INTERNATIONAL CEMENT

INTERNATIONAL CEMENT
Of the \$1,500,000 of International
Cement Corporation 8 per cent convertible five-year notes issued in
August, 1921, all have been converted
except \$350,592. These notes were issued at 99 and interest, and are convertible into the stock at \$33 1-3 a share
on or before March 20, 1923. Last
month the company announced that
all the outstanding notes would be redeemed March 20 at 110 and interest.

the merger of Morris and Armour pack-ing companies. The final details of the merger agreement were settled at 9200 Mexico Ol 10212 a conference in Jacksonville, Fla. last

held when the case is carried to the Supreme Court. A quick decision by the court is anticipated when the case is placed before it shortly after April In the meantime the merger will 2. In the r

STANDARD OIL OF CALIFORNIA OUTPUT

NEW YORK, March 10-Standard Oil Company of California has cut its production of crude oil from in excess of 100,000 barrels a day to 60,000 barrels a day, replacing it with purchased oil. Crude oil can be bought in California cheaper than it costs to produce.
The company is buying 80,000 bar-

rels of oil a day, thus handling a total of 140,000. Its profit is being made from the refining and marketing business.

AMERICAN SHIP & COMMERCE NEW YORK, March 10—The annual report of American Ship & Commerce Corporation will be issued on or about March 20. It is understood the company's statement will show a marked mprovement over 1921, when a net loss of over \$1,000,000 was reported.

Miller Rubber Company net sales for 1922 were \$24,764,244, compared with \$18,983,677 in 1921. Net income was \$3,116,607 after depreciation, obsolescence and interest charges, but before federal tax, and compares with an operating deficit of \$91,986 in the previous year. year.

NEVADA CONSOLIDATED LOSS Report of the Nevada Consolidated Copper Company for the fourth quarter of 1922 shows an operating loss of \$164,763 which after miscellaneous income resulted in a net profit of \$417,081, compared with a deficit of \$124,278 in the third quarter.

NEW YORK CURB

NEW YORK, March 19—The most important curb market movements in the past week were to lower levels. The declines which were most extensive in the motor stocks, ranged from 1 to more than 10 points.

Peerless Motor was one of the weak features, falling to 67% and after a good rally was again under pressure. Coal stocks showed strength at times, but were in supply in the last half of the week, when Glen Alden showed a loss of about 1 point.

Standard Oil issues were generally in supply at declines and also sustained substantial losses, the wildest movement being in Prairie Oil and Gas which ranged from 185 to 175 and Ohio Oil yielded from 85 to 31. Standard Oil of Indiana ranged from 69% to below 67. Independent Oil shares were irregular, Mammoth being a weak feature and declining about 4 points. Mutual Oil which was in steady demand until after the beginning of the week dropped 1 point. Humble Oil firsts advanced to 44% and

Speculative Issues Rise Sharply -Rails Are Disappointing -Europe Disregarded

NEW YORK, March 10 (Special)— The transactions in stocks from day to day, large as the aggregate is, scarcely could be characterized as representing a market movement, even in the most active industrial special-

It would be more accurate to say that those transactions represented very largely trading of a highly speculative character in those issues at the high levels to which they have been

The sharp reactions that occurred from time to time could not be re-garded as at all surprising. Conservathe fact that there have not been big breaks such as took place in Durant for instance, on Thursday, when it fell rapidly 14 points.

Speculative Pools Active

Speculative interests that have been largely responsible for the great ac-tivity in such issues as Stewart-War-ner Speedometer and American Bosch Magneto unquestionably have paid little or no attention even to the most little or no attention even to the important national and international developments. They have simply gone ahead with their speculative opera-tions, feeling sure of their ground and having a definite goal in view. It must be admitted that they have met with a surprising degree of success. On the other hand, it may be observed that such movements always have the assistance of a great number of people who are eager to make money quickly, and who are willing to take a big chance.
No one seemed to question the rea-

sonableness of the further active dealings in American and Baldwin Locomotive, Railway Steel Spring and other railway equipment shares. The placing of large orders with those companies by the railroads has been almost a daily occurrence for a long time and so far has shown no sign of stopping. Speculators who are looking well to the future are suggesting that, with railroad earnings as satisfactory as they were for January and February, and as they promise to be for some months to come, and with the position of the rai'roads so generally and greatly improved, it is per-fectly reasonable to expect that they will continue to buy equipment for

Rail Issues Disappointing

There was keen disappointment over vance for any length of time. Even railroad officials and bankers seem unable to explain this situation. Of course, it was claimed by those who are disposed to criticize that the Government has taken away practically every incentive to buy railroad stocks, even for investment. However, conservative and fair-minded observers

earnings of the railroads, as a whole, for February, and even of those lines in the northwest, where severe storms occurred at the middle of the promise to be surprisingly

The Northern Pacific and the Great Northern, whose lines were in the middle of the storm belt at that time, have reported preliminarily large in-creases in their gross earnings for that period. It remains to be seen how the net returns will come out, because of the extraordinarily large expenses in connection with the heavy

No Rediscount Rate Increase

One of the most actively discussed topics in the financial district, particularly during the first half of the week, was the probability of another advance soon in the New York federal reserve rediscount rate. There was general relief in speculative cir-cles when it became known this week that none would be made. This feeling of relief was intensified by dispatches from Washington quoting Secretary of the Treasury Mellon as expressing the opinion that the credit situation did not justify a further increase at this time, and, moreover, that no serious consideration had been

The showing made by the New York Federal Reserve Bank last week would seem to indicate that there is no occasion for that institution to further increase its discount rate in the immediate future. During the week the reserve ratio advanced from \$0.6 per cent to \$3.2 per cent. Since Feb. 14 loans are down \$85,000,000, cash has increased \$60,000,000, and deposit liabilities decreased \$74,000,000.

Political Events Disregarded

There were many announcements that, in such a market as we were accustomed to have in the days of the elder Morgan, E. H. Harriman and Roswell P. Flower, would have exerted a decisive influence on speculative or account. tive operations. With a few excepthat were made this week had much, if any, effect upon the daily transac-

tions in the most active issues.

It is unlikely that the particularly active issues such as Stromberg Car-buretor or others of a similar character were affected by what was called the beginning of President Harding's campaign for enlisting interest in par-ticipation in the World Court by the United States, or by Chancellor Cuno's speech in the Reichstag, setting forth Germany's attitude toward France and the troublesome question of rep-

arations.
Individual issues, such as American
Woolen and American Smelting & Refining for instance, were helped tem-porarily marketwise by favorable annual reports. While probably there was actual relief over the adjournment of Congress very little was said about it in the most active specula-

NEW MANHATTAN RAILWAY TERMS

Compromise Offer to Holders of Undeposited Stock

Of the \$60,000,000 Manhattan Railway stock, whose 7 per cent dividend was guaranteed by the Interborough Consolidated Corporation under a 999year lease of the road, 94 per cent has been deposited under the Interborough plan. By this plan, the Interborough Consolidated Corporation, a holding company, will disappear and the In-terborough Rapid Transit Company will be the lessor.

The plan provides that stock of Manhattan Railway Company will receive 3 per cent dividends for the fiscal year beginning July 1, 1922; 4 per cent for the next fiscal year and 5 per cent for each year thereafter. How-ever, after the Interborough pays 4 per cent on its own stock, it must pay 1 per cent additional to Manhattan stockholders for each 1 per cent additional declared on its own stock. Interborough dividends are limited to 7 per cent until July 1, 1950, and thereafter, if payments above that figure reduce its net assets below \$35,-

A compromise offer has been made to the 36,000 shares still undeposited which gives them an advantage over the deposited stock. They are offered Interborough notes, due Nov. 1, 1923, for the \$5.25 a share which was due under the 7 per cent guarantee for the seven months ending July 1 last and not paid. Thereafter they are offered the same dividend terms up to July 1, 1926, as the assenting stockholders receive, namely, 3 per cent for the current fiscal year, 4 per cent for the next year and 5 per cent for the two following years. Inasmuch as more than one-half of the present fiscal year has expired, the \$1.50 dividend due under the new rate will be paid in cash to undeposited stock which ac-

cepts the offer.
On July 1, 1926, therefore, such un-MALAYAN RUBBER EXPORTS

LONDON, March 10—British Malayan rubber exports during February amounted to 19,310 tons, compared with 22,871 in January and 20,033 in February, 1921.

deposited stock will have received exactly the same dividend treatment as the assenting stock and will be combined to 10,434,435 bales, valued at \$45,256,000, the Department of Commerce announced today, compared with exports during January, 1922, of 475,910 bales, valued at \$46,233,000.

be in good position to drive a better

This situation is reflected in current quotations for the stock. hattan guarantied stock (undeposited) is 54%, bid 56 offered; certificates of deposit for the same issue are 42% bid, 42% offered.

OUIET WEEK WITH UPWARD TREND ON LONDON EXCHANGE

By Special Cable

LONDON, March 10-The stock market has had another quiet week but again most of the price changes have shown an upward trend. Tin mines have taken the lead, though they reacted somewhat at the week's close. owing to a slight fall in the price of the metal, a clear indication that a real boom in this class of shares is still to be looked for.

Radios, after being inactive for a considerable time, have suddenly come into prominence and oils have also been to the fore, nearly all issues showing substantial gains under the lead of the Russians. The clause for the inclusion of these last named is generally attributed to the appoint-ment of Mr. Whise, who has resigned from the British Board of Trade to

become the economic adviser to the Russian Centrosoyus.

RAW COTTON EXPORTS UP

NEW YORK, ONTARIO & WESTERN HAVING DIFFICULT PERIOD

The New York, Ontario & Western Railway opened 1923 with a larger net operating deficit than for any month during the coal or shop strikes last year, \$208,615. In November there was a deficit from operations of \$193,011. The previous large deficit was \$389,118 in August, 1920. It is significant, however, that January has not shown any income since 1917 and that in 1920 there was an operating deficit of \$205.159.

The poor showing this year is directly traceable to high expenses, resulting from bad weather and the subnormal condition of motive power. Gross revenues of \$961,839 were \$2312 above 1921, the previous record. Ex-penses were \$1,069,055, laving a net deficit before taxes of \$107,216. Taxes and uncollectible revenues increased the deficit \$42.642, to \$149,858, com-pared with \$60,803 last year. Equip-615 last year, bringing final net from operations down to a deficit of \$208,-

615, compared with \$92,418 last year. Heavy snows last month continued poor operating conditions and February will show a deficit, though not so large as January's.

PHILADELPHIA SCHOOL LOAN PHILADELPHIA, March 10—Pids were opened for a \$3,000,000 Philadelphia School District 4 per cent loan dated April 1, 1923, and maturing serially 1933-52. Reilly, Brock & Co. bid 100.1737 for all or none. The loan was promptly awarded to them at 100.1737 and interest.

Earnings Cover Fixed Charges-Fine Paper Price Trend Up

After two years of lean business American Writing Paper Company is getting to where it should show substantial earnings on the preferred stock. Earnings at present just about cover fixed charges, including depreciation and bond interest, but increas ing operations are being reflected in improving earning power. There is \$12,500,000 preferred stock outstand-

annually accumulated since 1913. The market for fine papers is good and the price trend upward. So far the earlier deficit. Operations in the this year, prices of writing papers are early months were between 50 and 60 up 5 to 10 per cent, although increased labor costs are offsetting advances to

pared with \$60,803 last year.

ment and joint facility rentals were higher. \$58,757, compared with \$31.
that cutting off of some pulp supplies may mean a paper shortage. The fine may mean a paper shortage. The fine in effect since the first of the year, is 1920 net earnings available for the strengthening markets on the belief stock were \$1,688,000, equal to \$13.50 paper market follows closely general business conditions, so that American Writing Paper Company seems as-sured of activity better than at any

FARMERS BORROW FROM GOVERNMENT

TORONTO, Ont., March 7 (Special Correspondence)—Over \$2,000,000 in long-term loans was borrowed by On-tario farmers from the Ontario Government under the new rural credits scheme last year, and approximately \$175,000 in short-term loans. It is understood that the total amount now loaned by the Provincial Government on the long-term plan is close to \$4,-000,000, and nearly \$7,000,000 will be loaned before next fall. Applications for loans are coming in more rapidly, than they can be handled.

Isle Royale Copper Company reports for the year ended Dec. 31, 1922, a net loss from the copper delivered of \$88,774 as compared with \$47,873 in 1921. ISLE ROYALE REPORTS LOSS

Helpful Service

Readers of The Christian Science Monitor are finding that the Classified Advertisements provide a meeting place for buyer and seller—for the one re-quiring a definite service and the one who can provide it.

Whether the advertising is in relation to service, or employment, a room or an office, the sale of real estate, or the promotion of a business enterprise, the Monitor supplies a wide channel for the advertiser's appeal. And many are the expressions of appreciation for the results obtained.

In making use of the columns devoted to Classified Advertisements, readers will please bear in mind that two letters of reference are required of all those seeking positions, desiring help, or offering rooms for rent. Branch Advertising offices are located in the cities named

Boston, 107 Falmouth Street Tel. Back Bay 4830 New York, 21 East 40th Street Tel. Murray Hill 0777 Cleveland, 512 Bulkley Building Tel. Cherry 2000 Chicago, 1458 McCormick Building Tel. BUSINESS OPPORTUNITIES

ANY MAN

CAN EARN \$5000 PER YEAR CAN EARN \$5000 PER YEAR

If you have 100 friends or acquaintances in
Chicago who would patronise you if you were in
business selling a product that each and every
one of your friends actually needs, and if you
could guarantee satisfaction, and if with our
capital and under our supervision you are willing to work—\$5000 per year is only your beginning. This proposition is strictly high-class.
Address Box X-3, The Christian Science Monitor.
1458 McCormick Building, Chicago, Ill., for
appointment.

AN EXCELLENT opportunity is open to pur-base an interest in a successful manufacturing concern now doing an established business in several states: investigation invited. Box P-10, The Christian Science Monitor, 21 E. 40th Street, New York City.

MUSIC OF THE WORLD

Future Music of America and Varèse as Its Pioneer

nineteenth century was the century of the emotions. It produced Berlios, Chopin, Lisst and Wagner, the great romantics. The twentieth century, which is slowly becoming realized as representing an objective type of manhood and therefore of culture, will be the century of power. This not only may be deduced from the character of the international artistic currents becoming every year more positive and irresistible under the eddies of a rather confused cultural sea, but will also become apparent to the student of comparative arts, as he attempts to fathom the mystery of these seeds. His double heredity nineteenth century was the century of the emotions. It produced Berlioz, Chopin, Lisst and Wagner, the great as he attempts to fathom the mystery of the growth of the various cultural

tury after century.

As the general lines of such a study cannot be laid down in the space of the essential characteristics of our century are slowly becoming manifest in the works of a few especially repre-sentative artists, embodying the progressive elements of civilization. In a preceding article I pointed out the real foundations of the new French school of Paris, its nationalistic viewpoint, its reactionary and dogmatic tendencies. Let us understand that such a viewpoint is not exclusively French, but manifests itself in nearly

entities appearing in succession, cen-

Two Trends

Thus we see that two definite and opposite trends may be found in the cultural world of today: one is based on nationalism, the other on interna-tionalism. The "Groupe des Six," Prokofieff, Bela Bartók, Richard Strauss and the new humorists' school alism in music. All these musicians strongly to their various nastress upon the fundamental identity its manifestation (which modes con-stitute the various racial individualities). The first type says: I am French, then man. The second says: I am a man who happens to be in a French body. Nationalism breeds hatred of the foreigner. Wherever such a hatred exists the fundamental interhuman quality is killed, music ceases to express the essential life of man, his ideal, his fervor, his aspirations—colored as they may be by cause he simply forgets man alto-racial idiosyncracies—it expresses only gether, and identifies himself with the Miss Mackinlay's entertainment is the sum-total of the superficial fashions which constitute the outer makeup of a "netion," not truly of a race Scriabin stood as an accomplished type of internationalist in music; that is, an exponent of the "purely human." Not that he was anti-nationalist, or even non-nationalist. But he was a man first, therefore one with all men whatever their nationality might have been. So were Liszt and Mahler before him, to name only the greatest

The Essential Point

We insist on this point because it is an essential one today. America should be considered as the new soil (culturally speaking) which will be the home of the next civilization when slumber and medievalism which seems to me fast approaching. It is nationalism which is killing Europe. The various European states could not and cannot realize their fundamental identity, unite and constitute the United States of Europe, which alone could have produced a true European culture. Now the American civilization which is slowly developing is in-herently an heir to the European civilization. Will it inherit its nationalistic attitude, or will it repudiate it at the outset and begin to think in terms of interhuman unity?

This is the tremendous question being raised today, socially and politinot faced courageously and conscientiously, it will necessarily mean that America will follow the line of Euro-pean inheritance. Witness the notion of "Americanism" prevailing in some quarters of the artistic world. It comes in direct line from Europe. European artists, composers and instrumentalists ceaselessly identify themselves with the musical life of America, become Americans officially and, more important still, idealisti-

Native American artists receive their education from European mas-ters. Thus European ideas are sown in the American cultural soil as seeds. Soon they will germinate, sprout forth and fructify. They have done it already in several instances. If these seeds contain the germ of nationalistic separativeness, the future will repeat the past, and various schools will war vithin the borders of America instead of co-operating, with, as aim, a true synthetic culture. Such a glorious synthetic culture can manifest itself only if America responds to the ideal-istic note of artistic internationalism, which is not indifference to race, but human-ism as a fundamental, and ra-

cialism as overtone.

41 Bromfield Street

By D. RUDHYAR

"HE eighteenth century was the century of the intellect. It gave us Bach, Rameau and Gluck. The neteenth century was the century to a musician who incarnates now to a musician who incarnates

of these seeds. His double heredity (Burgundy and Italy) makes him parin an earlier article-the Celtic and the Latin. He thus embodies the fundamental dualism of the real French cannot be laid down in the space of culture: abstract power and intrin-can be done is to show how some of sicality. on one side, and colorful-the essential characteristics of our ness, rhythm and vital exuberance, on the other. The second element pre-dominates in Varèse's music, and he may be said to continue the line which originated in Berlioz and passes through Stravinsky. Thus he em-bodies one aspect of the power which, as we said, is going to be the dom-inant characteristic of the twentieth century. Whereas, the musical fa-scisti of all nations pervert this power and use it, consciously or not, as a destructive agency, as a force working against the natural development of a humanity of free men, the true internationalists go to the source of this power and let it be poured through their works, which thus be "fountains of youth."

Elemental Energy Varèse's music is powerfully vital. in England can be counted among the It unfurls its sonorous substance with most representative factors of nation- an elemental energy, pulsating with a wealth of rhythms and sonorities tional idiosyncrasies. They lay stress before which the "Sacre du Prinupon differentiation of temperaments temps" of Stravinsky almost begins and accentuate them, whereas the true to pale. "Americans," Varèse's main internationalist — or human-ist — lays symphonic work, is an immense hymn to life, pregnant with joy and of the human element in all modes of light, progressing with sonorous its manifestation (which modes conus a step further than Stravinsky. It indeed the public to which Corney is more synthetic, more climactic, Grain and his friends appealed has more joyful. Stravinsky is a pessimist, in the sense that he makes us did chiefly of those who as a rule of always feel the insignificance of man life would not go to the theater. Corin relation to nature. He negates, as ney Grain himself used to poke fun adapt; only to realize the situation. Warese's works are optimistic, become to which a curate could always

> native tradition of the continent. The discuss, and quarrel about, nor is it use of the percussion is fully Indian, and the shricking of the brasses is which they sometimes think is childfull of the intensity displayed in the like. It is the unconscious natural spring rites of the warrior tribes. If art of "Let's pretend." Stravinsky evokes for us the vision of pagan Russia, Varèse resurrects for the passing races of America

Rooted in American Soil

This fact is significant. It shows the stage of true Europeanism, comes

ity. Civilizations perish. But the type ing upon his ladle and assuming with time comes the type finds human beings in which to become alive again. This marks the beginning of a new cycle. Who are these human beings in whom the type may live? Not those.

The Famous Duke of York in whom the type may live? Not those. register. Who are these human beings in whom the type may live? Not those who came to the land in order to conquer and destroy, who brought with them the blemishes of a decadent civilization; but those who came after having reached the synthetic stage of the old culture and thereafter are ready to be born anew in the world of the future. bringing to this future, the longinterhuman, world-wide consciousness est will be this warlike gentleman of men for whom racialism is an inconquest.

Beethoven Song Discovered

hich is not indifference to race, but man-ism as a fundamental, and ralalism as overtone.

We have studied briefly musical tenor, M. Lener. The manuscripts of fascism or aggressive nationalism in both the vocal part and the orchestral its most characteristic manifestation;

> understand Don Quixote. Then again, in an extract form, the immortal Alice's adventures, the scene from the book where Alice becomes a Queen, is faithfully presented. There is no attempt to embellish or stood up on his seat and made public protest, only to be hushed and howled

down by egregious elders.

But Miss Mackinlay does not confine her attention to children; her presentation of old folk songs and ballads is unsurpassed in London. She would be the last to claim that she has the wonderful voice of her gifted mother, Mme. Antoinette Sterling, but she cerwears it beautifully.

The New Dignity of the Accompanist By W. H. HADDON SQUIRE

EN JONSON asserted that "a good poet's made as well as born" and good accompanist. Accompanists of rhythm—sets his accompanist an sometimes imagine, however, that havimpossible task. It takes two to make ing been born, no further qualifica- a song or a piece sound like a musical tion is necessary. And in spite of the big advance made in general musical culture, many concert-goers still regard the art of accompanying as a sort of musical "side-line"—to accompanist as having much the same artistic status as the delegate from the piano firm, who lifts up the lid for a solo pianist. Most people have heard how when a student asked Sir Walter Parratt for his definition of a "false relation," he instantly replied,
"Your mother-in-law," Harry Plunket
Greene, in his "Interpretation in Song," points out that the false rela-tions of accompanist and singer, for example, are yet another of the legacies of the much-maligned Victorian

"Not so very long ago" he writes, the accompanist in this country

counted for nothing in interpretation. A dozen songs and a few arias carried A dozen songs and a few arias carried the singer everywhere; the public demanded no more, and the accompanist knew them by heart. Voice and vocal efforts, and the personality of the individual, were all that mattered; the individual sang, made his effects, stopped the song where he liked, picked it up where he liked, and the accompanist "followed." We have changed all that. The modern song is not a voice-part furnished with an accompaniment, but a work of art woven out of the two."

By way of instances he mentions

Exacting Demands Mr. Plunket Greene is himself one of the best known singers on the English concert platform he writes of what he knows. Since his book was published the demands made on the musicianship and artistry of the accompanist have become even more exacting. The mere sight of certain vocal works by Debussy and Ravel would have tempted the old-time accompanist's hair to stand on end. Now and again some enterprising impresario, with his eye on the public, equally eminent pianist to play together the "Kreutzer" or the Franck -it is always one or the otherlights neither my ears nor my judg-

eminent colleague, the accompanist, who gives him a place in the sun. Perhaps no branch of interpretative the children's classics. The present work is so little understood-even by musicians—as the art of accompany-ing. And, naturally enough, so far as the general public is concerned, the better it is done the less it is notive perception of form, color, and atmosphere, accompanying has a fascination peculiarly its own. It is sical art.

Those who regularly attend concerts cannot but be aware that the ac-companying is not by any means what it should be. Occasionally the soloist deserves almost more blame than his partner, for the "one-liner," alas, still lingers on—a relic of the period when the harmonic horizon of song wears it beautifully. wisely, they gave most of their attention to the tune on the top. These livan wrote "The Lost Chord." His despairing organist who carelessly lost a new chord was, like many others, quite justifiably "weary and ill at ease" after long years of diatonic harmony. The singer and player with poet's made as well as born" and no sense of harmonic rhythm—some-perhaps that is true also of a times there is no sense of any kind quarrel; and, likewise, it takes two to produce a genuine ensemble.

efforts, and the personality of the individual, were all that mattered; the individual sang, made his effects, stopped the song where he liked, and the accompanist 'followed.' We have changed all that. The modern song is not a voice-part furnished with an accompaniment, but a work of art woven out of the two."

By way of instances he mentions the "Erikönig," "Auf dem Wasser two ven out of the two."

By way of instances he mentions the "Erikönig," "Auf dem Wasser is works in which the accompaniment is of equal musical importance with the voice part, and occasionally of higher. And he goes on to ask, How many songs give the whole illustration while the voice simply gives the atmosphere; or the atmosphere while the voice gives the illustration? We have progressed since the days of the Alberti bass.

Exacting Demands

By G. JEAN-AUBRY

N the middle of March, France will celebrate the centenary of Théodore de Banville, whose glory has decreased a little during the last 20 to this French work he had come across by chance. This is no mean decrease a little during the last 20 that the young musician of those days has now become one of the greatest and most original composers of our time: Manuel de Falla.

As a consequence of his natural inclination for verse-music and of his relations with musicians of the type of the most musical among the poets to whom France has given birth. He was a poet-musician in both senses of the term: first of all because he was even those with whom the great public not yet, or no longer, showed symmentions Rossini and Meyerbeer, who complete mastery of the craft of the content of the content of the craft of the content o with Verlaine as a poet who possessed complete mastery of the craft of French poetry, its rules and its resources. Every combination of rhyme and rhythm was known to him and used by him with perfect ease; what is properly called "the music of the verse" was not merely a gift with him; it was a preoccupation. All his life he endeavored to strengthen his virtuosity, and although his first volume, "Les Cariatides," written at the age of 18, already showed surprising technical skill, he never ceased to enrich it and render it more flexible, expressing by its means sometimes the most elevated lyricism, and sometimes a pleasant and by no means bitter satire.

and what happens? The public, seeing two famous players on the platform at the same time, will probably imagine the sense that he always had a lively the same time, will probably imagine that it is getting a double measure of artistry and applaud with rapture, but, in nine instances out of ten, the musician's ears tell him that the result, musically, is anything but the routcome of a single thought and two hearts that beat as one. And as a concert-grand can be made to emit a bigger noise than any other stringed in granuler, the violinist retires in Standhal Commiss immediately after. instrument, the violinist retires in Stendhal. Coming immediately after complete sympathy with Schubert these artists, Banville showed from when he wrote, "There I played alone, and not without success, for I was assured that the keys under my hands although the fact is all but unknown, he published a preface for a book on music entitled "Une Révolution dans that accursed thumping, which even eminent players adopt, but which delights neither my ears nor my judg-Louis Lucas. The work seems to have A Little Understood Art had a certain success at that time; in any event, it reappeared in 1854
So it comes about that the violinist under the new title of "L'Acoustique

In this preface, Banville says the collowing: "To realize the thought of Plato, to find the general harmonies, e. g., the basis of all combinations, by which the author of a 'Revolution in Music' has attained." The volume has now sunk into complete oblivion in France and elsewhere.

ARTISTS

were the favorites of the day, and Mozart, whom all the world accepted and admired, but even Beethoven and Gluck, who did not arouse universal enthusiasm in the France of those days. In his volumes of prose-por-traits entitled "Camées parisiens" may be found sketches of Auber, Rossini, Liszt, and Gounod, as well as those of some of the great executive artists of the period: Adelina Patti, Pauline Viardot, and Christine Nilsson. They are drawn with great verve and truth, with the sympathy of a man who feels a keen admiration for the splendors of music, mingled with a little envy for not being able to match them in words

Banville and Debussy

Curiously enough, Théodore de Banville has not found as much favor with composers as several other French poets, and it is difficult to imagine why some of his poems have not attracted musicians at least as strongly as those by Hugo, Sully-Prudhomme or Gautier, even if they had not the fascination which those of Verlaine have exercised on the composers of many countries. The songs written on words by Théodore de Banville are soon counted. And yet, it must be remembered that there was one composer who, in his youth, was sufficiently strongly attracted by him to write incidental music—now unfortunately destroyed—to "La Diane au Bois," a verse-play in two acts by Banville. The same composer, too, has left us a song on verses by that poet, the first published by him in 1876, entitled "Nuit d'Etolles," and that composer was no other than Claude Debussy. When, 10 years later, he returned from Rome. fashions and tastes among the young artists had changed in favor of more recent poets. But the work of Théodore de Banville is as young as today, and musicians have not paid all the debt they owe to that refined musical and musicianly poet.

When ordering specify whether High or Low Voice. SPECIAL! On receipt of \$1.00 we will send one each of all the above four songs. HAROLD FLAMMER

Paladins in Sicily

flock night after night to follow, with gero and Charlemagne and Orlando, and Rinaldo and the rest of that noble host. Night after night the saga is resumed, installment by installment, every figure in the thrilling drama being as familiar to the audience as own families or next-door

The "Introduction" to the cycle, which begins with the conversion of the Emperor Constantine, runs through his sons and descendants down to "Pipino," King of France and father of Charlemagne, lasts about a month. Then comes the "Story of the Paladins," with Charlemagne, and all the spirited and debonair knights, and their adventures, ending with the defeat of Orlando and the paladins at Roncisvalle, the whole sequence asting about six months. After this another three mo with the "Story of the Sons of the Paladins" and the crusades. Then follows the "Story of Balocco," with more noble paladins, lasting six months, and finally the "Story of Michele, Emperor of Belgium," and his wars against the Sansaara, which is wars against the Saracens, which lasts another three months, and then da capo; for the Sicilian never wearies of seeing his beloved pupi represent ng the heroic and grandiloquent estures and deeds of these heroes of the past. He will go gladly at in-tervals to pieces based on the adventures of Garibaldi, or to the religious performances which take place at Christmas and other festivals; and 'Samson" and various other pieces get a turn now and then, as well as, from time to time, a modern ballet or opera: but it is to the paladins that they are st steadfastly devoted, it is by their exploits that the popular imagination is most keenly fired.

These paladins are magnificent personages, often as much as four feet high, and equipped with glittering armor of tin, enriched with brass and copper, with helmet, cuirass, arm-andes, shield and sword complete, great colored plumes waving proudly above their unchanging but expressive faces. They are made of wood, with loose joints under their armor. An iron rod passed through the head is hooked into a ring be tween the shoulders, while another rod is fastened to the right wrist There are also strings for the left arm, the shield, and the visor of the helmot, so that it can be raised at will. In short, the effect is most imposing, and a really handsome paladin is a costly matter. A good-sized com-pany of pupi, as the marionettes are called in Sicily, will comprise several hundred figures, a large contingent of which will be paladins, with the addi-tion of some Turkish and Spanish sol-

The poet Keats, as is well known, wrote, and was even inspired to sketch at Shanklin; and so one morning we approached the old church in of the elms since his day have made it questionable from which side he did the drawing; the view from the meadow is quite blocked out until the stile is reached and one comes upon he little church at close quarters. His choice may well have been from the south, but this remains only a conjecture, since his modesty appar-ently prevented the sketch from being

trast to the verdant softness of the

preserved. We strolled on and were soon reminded of a definite and surviving ex-pression of the poet; for passing through the old thatched village and turning down a winding lane arched with a thicket of overhanging foliage, we came upon the soft turf of "Keat Green" where this inscription from "Endymion" met our eyes: "A thing of beauty is a joy forever"! Truly the greensward sloping along the edge of the cliff, bordered by a profusion of flowering hydrangeas, lifting their varicolored masses to the blue overhead-and below, the depths of the ocean stirred by the summer breeze, made one stay and ponder over the poet's enduring words.

Pearl and Turquoise

Until three o'clock in the afternoon we felt our way northward through a fog-bound ocean. Then the mist nantle magically lifted, and we found ourselves about a dozen miles off the ntrance to Ice Fjord.

The wondrous beauty of that first

of Spitzbergen is not easily described. Northward there rose from the horizon the snow-encrusted spires of Prince Charles Foreland. East, the mainland of Spitzbergen, a land of pointed hills still deep-buried beneath their winter mantle, was flooded with the pale light of the Arctic sun. Everywhere in the heavens was blue sky without a single cloud. This blue trunk of the Arctic sky is altogether a colour place. by itself; words cannot well describe it. The clearness of the air is, perhaps, the most wonderful thing. In stories they love, imitate their elders it distances are deceptive; far-away in gesture and mannerism, dress up on hills seem near, though, of a truth, ethereal things.

Editorials

THERE can be no doubt that mankind is gradually waking up to the underlying cause of its present troubles.

The outcome of the World War

The Road to Better Times The outcome of the World War represented a great triumph for progress. The forces of reaction and tyranny, which had believed that they could stem the advancing tide of democracy and freedom by the establishment of a universal military despotism over Europe, were heavily defeated. Once the call sounded, men and women of good will sprang to

meet the challenge until, by 1918, practically all civilized humanity was playing an active and intelligent part in the work of making the world safe for democracy and progress. It was not until all the forces of civilization were consciously enlisted in the fight that the Canaanite began to yield to the Israelite. But no sooner were they all united in a common battle plan than the organized forces of evil vanished with a speed and completeness which seemed almost miraculous to vanquished and victor

But after the victory there happened what has so often happened before. The armies of those who had stood for the right began to falter in their course. Some of them had become too engrossed in the military struggle to realize that victory in the field was only the beginning of their task. So they went home without helping to build the foundations of the temple of the world's peace. Others had become obsessed with fear and hatred of those who had fought under the banner of autocracy. So they wanted to carry the war on into the times of peace in another form. Others again thought that victory entitled them to special positions of power and privilege and profit in the world, forgetting the declarations with which they had embarked on the struggle. One and all forgot or failed to read the full lesson of the conflict, that not only must victory be gained over oppression, but that freedom and democracy and prosperity could alone come from steadfast unity among those who stood for these things. So the peoples each returned to their own lands, thinking only of themselves.

It did not take long for the law which underlies all human affairs to assert itself. Somehow the victory which all had acclaimed did not bear the expected fruit. Naturally all the peoples, believing in their own rectitude, began to find the explanation in the faults of their neighbors. They themselves at any rate were not to blame. But condemning their neighbors did not make things much better, either. Rather it made them worse, for it produced bitterness and suspicion and estrangement among those who had fought together for the great cause, while it gave comfort to the forces of reaction, which began to dream of recovering what they had lost. So the period of so-called peacemaking has ended in the complete victory of the Turks over the Allies, at the expense of the Armenians and others, and in a renewed war between France and Germany, this time an economic war, which will probably secure nothing of value to either side and will plunge the whole world still further into the slough of economic and political despond.

It must be obvious to thinking people that we are never going to secure better times by proceeding any further along the road which we have been following for the last two years. The real lesson of the war was that the world had become so small in terms of time and space that the notion that nations could live in water-tight compartments, whether in Europe or elsewhere, was absurd, as well as a fundamental denial of that primary law of human happiness, the Golden Rule. Just as citizens of one country are "members one of another" and can secure neither happiness, freedom, nor prosperity until they base their conduct upon a practical recognition of the fact, so the nations are "members one of another," and they will never secure the peace and freedom they seek until they also begin to recognize the underlying truth in practical form; and, just as progress in domestic reform depends upon the more enlightened citizens taking the lead, so international progress depends upon the most enlightened nations bringing their ideals and experience to bear in the common councils of the world. The peace, like the war, will only be won by the active co-operation of the whole civilized world. The primary condition for the solution of our present discontent is that all nations should begin to repent of their own contribution to that course of action which is now patently leading them all into the slough of despond, the vanguished nations of their conduct during the war, the victor nations of their conduct since the war, and render obedience to the only rules which will solve their problems: "we are members one of another," and "whatsoever ye would that men should do to you, do ye even so to them."

THE increasing cost of modern education is seriously considered by Dr. Henry S. Pritchett, president of the

Limiting School Privileges Carnegie Foundation, in his annual report, lately published. It is declared that this cost is so great that ways must be found to relieve the taxpayer, even if it becomes necessary to curtail the privileges of public education now enjoyed. It is significant that Dr. Pritchett makes it quite clear that he believes a definite curtailment of these

privileges should be agreed upon to the end that those whom he regards as better qualified, intellectually, may be given advantages over those who are adapted only to follow the crafts and trades. Thus there is noted again the tendency among those who are in positions of influence or power in shaping educational policies, to foster, if not actually to set up, what has been referred to as an intellectual aristocracy. It is a definite departure from

the boasted American theory which includes the education of the masses, and which has idealized the public school as the nursery of democracy.

The application of any limiting regulation which would preclude, arbitrarily, the education of one boy or girl that preferential training might be given to another, presumes the right of someone in authority to determine, by whatever rule or process he may adopt, the supposed potential intellectual capacities of applicants. It would deny to the dullard the privilege of gaining, by the slow and possibly uncertain processes provided, a release from a condition which he may recognize just as keenly as those who would deny him a hoped-for emancipation. It would condemn to a state of continuing inferiority thousands, and perhaps millions, of youths who might rise, as millions heretofore have risen, by assimilating, even by slow and somewhat expensive processes, the fundamentals taught in the public schools.

Whatever may be the conclusion reached by Dr. Pritchett from his survey of the public schools, or by those other eminent educators who have devoted study to the problems of the colleges, one cannot fail to see, in the proposal to check the mounting cost of education by assuring its benefits only to the "intellectually fit," an expedient economically unsound and destructive of the very foundations of the democracy.

OF COURSE Senator Johnson has taken up the attack upon President Harding's advocacy of participation in

The
World Court

in Issue

the Court of International Justice. With but a few hours to spare prior to sailing for Europe, the California Senator let fly his opening volley. He is against the court, mainly, it appears, because it is devoid of any physical power whereby to enforce its verdicts. Only a few weeks ago the Senator was denouncing,

even as he now denounces, the League of Nations very largely because it was provided with means for enforcing its findings. The Senator's satire is biting when directed at a World's Court without teeth, but no more so than when it is employed to destroy the fabric of the League of Nations, to which the peoples of the world seek to give teeth.

The Washington correspondents are speculating upon this speech as the opening gun in the Senator's campaign for the presidency. They point out that, in accordance with time-honored political practice, he has declared himself on what promises to be a dominant political issue, and has sailed gayly off to regions of political quietude, leaving others to wrangle over the issue he has raised. The Senator himself has neither denied nor affirmed his hope of securing the Republican nomination, but his followers are outspoken in their insistence that he should be a candidate. It would go far toward clarifying the political situation and educating the public mind if, as seems possible, Senator Johnson should be the chief opponent of President Harding before the next Republican national convention. Being an unconventional, not to say iconoclastic, person, the Californian should not be deterred by what less hard-handed politicians call the impropriety of opposing the President in his own party.

Senator Johnson conscientiously and unqualifiedly believes that the United States should retire like the tortoise into its shell, and leave the outer world to rage while it lives on its own fat. He is opposed alike to participation in an international tribunal which proposes the settlement of international issues by moral force, and to the League of Nations which would settle them by economic pressure or by even more militant methods. For him internationalism exists only as an evil to be routed out wherever found.

It is perfectly evident that President Harding, if he shall determine to be a candidate for renomination, will make the World Court a leading issue in his campaign. It is reasonable to believe that he will go further than this, to the extent at least of holding forth some promise of ultimate participation in the League.

If these two Republican leaders shall thus sharply define the issues upon which they seek public support, the electorate will be educated prior to the nominating convention, and the final campaign between the two great parties will necessarily turn largely upon the attitude of the United States Government toward a world beyond its territory.

This is a political situation not often presented in a political campaign, but one that would add greatly to the ultimate value of the decision arrived at, and make clear the position of the United States to the world.

EVEN an accused person, though admitting his guilt, is entitled to his day in court. He may claim, as a mat-

Property

Rights in

Contraband

Whisky

ter of right, that he shall be heard. Indeed the law, in its considerate wisdom, compels this reasonable concession to the end that full, and not partial, justice shall be done. But this protective policy does not presuppose a mitigation, because of the concession, of the punishment which conviction or a plea of guilty entails. One is in-

clined to wonder, in the light of recent frequent decisions rendered in cases where property rights in contraband whisky have been asserted by those who have openly and flagrantly defied the law through the illegal sale of such liquor, why it is that the presumption of rightful ownership-almost invariably seems to prevail in favor of the offenders.

It is presumptuous, probably, for a layman not fully informed as to the law or the facts, to question the fairness or justice of a court decision rendered in accordance with the findings in a particular case. But it is worthy of comment that in cases recently decided in an eastern jurisdiction in the United States, vast quantities of so-called contraband whisky seized in what were sup-

posed to be regularly ordered proceedings, have been turned back to the protesting original owners. It was claimed, and affirmatively shown, that these seizures were ordered following disclosures made to enforcement officers that sales of liquor had been made in violation of the law. It is not known that these charges were ever disproved. And yet, because of some technicality, it appearing in one instance that liquors in excess of the amount specified in the warrant had been seized, restoration of the contraband stock was ordered.

It might be argued as logically that, if a prisoner arrested for stealing a horse could be shown to have stolen two horses, he should be permitted to go free. It would seem to be a wise construction of the law, in face of the wholesale violations of its provisions, that all claimed property rights in liquor stocks illegally held should be summarily disregarded. The presumption of innocence with which the law surrounds a suspected person, thus imposing upon his accusers the necessity of proving his guilt, does not obtain in the matter of liquors, the possession of which presupposes a guilty intent.

Social service, which is said to be one of the main purposes of the trustees of the Juilliard Musical Foun-

The

Juilliard

Musical

Foundation

dation, can easily mean nothing more than that a feeling of neighborliness is to be promoted amongst citizens of American communities through free concerts, and that ambition for vocal and instrumental study is to be fostered amongst individuals through free teaching; or it may mean that the expressive powers of the public are to be

awakened, and that the opportunities of persons gifted for recording the thought and aspiration of the day in tone will be extended. It may signify, that is to say, that classic symphony performances will be placed within the reach of all who want to hear them, and that a master will be available for everybody who seriously wishes to sing or play; or, it may signify that the people of the United States will be aroused to the need of a music of their own, and that men and women talented for composing will find the economic problem of following their bent solved.

The institution, then, which has been established under the will of Augustus D. Juilliard, may apply its funds to indirect artistic ends or to direct ones. It may reap fields cultivated in the past, like farmers who, year after year, mow grass lots their fathers seeded; or, it may put in the plow and till the land afresh, unless, indeed, it should venture to break new ground altogether. One indirect thing it may do, is to turn its attention to Americanization, which has of late come to represent more or less the idea of social service. A direct thing it may do, is to set its energies toward the encouragement of an American school, even divers American schools, of tonal thinking.

If Americanization is the sort of social service designed by the Juilliard trustees, the question may fairly be asked how Americanization is expected to be accomplished through the agency of German composers, whose works principally figure in symphony concert programs and in the courses of study of conservatory and college classes? Beethoven and Wagner can hardly be expected to Americanize anybody. The fifth symphony and the overture to "Tannhäuser" can scarcely be counted upon to consolidate American political sentiment. Those who fancy so ought to think what a minority and "Yankee Doodle" once achieved in America.

Service, undeniably, the \$10,000,000 philanthropy just getting under way in New York must give. A broad artistic service, however, it might more reasonably be imagined as doing, its name considered, than a special one that rather doubtfully answers a need of the moment. The foundation, in fine, can formulate a temporary policy, making music work for the country; and again, and better, it can formulate a permanent one, making the country work for music.

Editorial Notes

Though perhaps few people know how gorgeous a green-billed toucan is, yet those who do are likely to ask, when informed that Lord Waring recently presented one of these beautiful birds to the London Zoological Society, why anyone so fortunate as to own such a bird should ever give it away. It is a large creature, glossy black above, with streaks of scarlet on its tail, the throat lemonyellow with an orange patch, the under parts sharply divided into scarlet and black areas, and it has a huge bill greenish in color. Toucans, however, are exceedingly restless by nature and do not thrive unless provided with an aviary much larger than is convenient in the ordinary London house. Then, too, they are inordinately greedy and extremely untidy. But for physical beauty there are few, if any, birds which are their equal, or which can give more nearly the appearance of being dressed in colors chosen by a daring post-impressionist and put on with the careful skill of an old master. + + +

A CONTROVERSY is at present engaging the attention of many bacteriologists. Its subject is a theory advanced by one authority, to explain certain allegedly observed phenomena, that bacteria are subject to attack by organisms still smaller than themselves, organisms invisible under any known microscope. It is asserted that this theory has neither been proved nor disproved, but that "it is sufficiently obvious" (why, is not explained) that it is of great interest and importance.

Great germs have little germs upon their backs to bite 'em
And little germs have lesser germs, and so ad infinitum,
And the great germs themselves, in turn, have greater

germs to go on; While these again have greater still, and greater still,

The Last Triumph of the Fez

By V. A. TSANOFF.

HATS are cheap in Constantinople nowadays, and fezzes are dear. Politics sets the fashion, and the market is unsteady.

Karageuz, the pithy, if pugnacious, comic weekly speaking to the man in the street, as its æsthetic confrère, Ak Baba, speaks to the intellectuals, has observed this fact.

"What need is there of newspapers any more?" Karageuz

"Go down to the bridge, and watch the crowd: if fezzes predominate, then Kemal Pasha is winning. If hats predominate, then he is losing

"Strange it is, my friend, how sensitive heads have become to the weather!"

But, incidentally said, if any reader thinks that the Turk is simply, a savage brandishing a sword, and lacking connected speech, the esprit of these weeklies would inform him of his error. They are invaluable most of all to a conscience-ridden stranger here, who will not write on Turks, or apples, without knowing about them.

I have been to the bridge, as the Karageuz directs, and unmistakably Kemal has been winning.

What is a fez? A bit of crimson cloth shaped like a flower pot, with a tassel. It is suspected that its origin is from the Greek islanders, or mountaineers.

Sultan Muhammad, the great reformer who suppressed the janizaries, introduced the fez in Turkey. It came as a military cap for his regular army. He wore it. And everyone else but the hodjas (Turkish teachers) were not long in following suit.

The fez was a great advance in civilization over its predecessor, the turban, a heavy sort of headgear, made up of a bottom, and a shawl or towel of different color wound up

In an American college dormitory the fez is simply picturesque.

To a Balkan Christian it is instinctively a sign of overlord-

ship, and hostility.

It is a crown. And this explains so many of them on Christian heads.

But, in fact, the fez is a symbol of humility before Allah. This is its true significance, connected with a very practical use to which it is put. Five times a day its wearer faces the Black Stone in Mecca and prays. His is a muscular religion. His whole body, every muscle of it, participates in his devotions. And he often touches the ground with his forehead. There is where he needs a head-covering: the soft fez or turban furnishes it.

It makes an impressive sight to see worshipers' brows by the thousand and score of thousand touch the ground and rest on it a while as a sign of submission to Allah, on those greater fêtes of the year in the more spacious mosques of Stamboul. Squatting, rolled up on their knees and toes, their bodies sway backward and forward like the metronome at a dignified beat of thirty to the minute.

beat of thirty to the minute.

Jerkily, Russians not seldom drop to the stone pavements of their churches and touch the floor. They did it once before their tsars, as you can see in Count Alexis Tolstoy's "Boris Godunoff," now running in America on the Khudozhestvenny Theater's repertory. But the Russian is soft as putty when he arises from the floor, sentimental, hearty.

The Turk's humility is confined to his devotions. A pride that brooks no challenge replaces it, when he arises. On the Turk's impassive face one reads eternity. He has nothing to say even to his fellow worshiper.

On a Christian's head the fez is a symbol of submission to man. It is meant to ransom the wearer, and propitiate a possible attacker.

Mixed feelings arise in one's breast as he boards a car bound for Galata and Stamboul fairly early in the morning and casts a glance at its fezzed and betasseled passengers. The Turk is an early riser, is one's first thought, but it requires checking up. Look, all are bent over their newspapers, quite as they do in other countries at this time of the day when going to their places of business. But the newspapers most of them are reading are not Turkish. They are Greek, often Armenian, and still oftener French.

Those "Frenchmen" by adoption, and Greeks and Armenians, find the fez useful—when Constantinople is not occupied by the allied forces. And the periods when English, Italian, or French occupation has been vouchsafed the European or Asiatic city here have been very rare and brief in the last 500 years.

The last permanent occupation which history knows about was in 1200. Unfortunately for the Latin Emperor enthroned in Constantinople then, the Bulgarian Tsar Kaloyan captured him, put him in a cage, and had him carried that way to captivity at the head of his army.

But young Levantines, Greeks, or Armenians dislike to bow to the Moslem. When they are given an opportunity they fly to hats. The hat trade was the most remunerative one in Constantinople between the two—oh, so different—armistices of Mudros and Mudania. Since the latter, the slump has been appalling.

The befezzing of Constantinople in 1922 is perhaps not a calamity. Karageuz has told us plainly enough what the Turks think of it.

But it has its amusing side.

This great demonstration of the Christians' fidelity and friendship for the Turks is occurring at a time when the Turks themselves are turning away from the fez. The crimson bit of color is no longer tight on Turkish heads.

Fezzes are cheap in Anatolia.

Angora has discarded the fez. as an

Angora has discarded the fez, as an earnest of its reforming intentions, and substituted for it for civilians a home-made lambskin headdress, much worn in the Caucasus, and from there spreading northward in Russia. For its army the Grand National Assembly has introduced a regulation military cap of khaki woolen cloth, similar in shape to the Austrian, but without flaps. By that Angora means that its army is a national force, not a religious one.

So in Stamboul Christians are changing belatedly to fezzes, while fervent Nationalists are changing to kalpaks (black lambskin caps). They wear them creased parallel to the forehead, as a Papal mitre, not perpendicularly, as the Russians do.

head, as a Papal mitre, not perpendicularly, as the Russians do.
"We will discard the fez entirely," my gallant pasha friend
tells me. "Within a year it will disappear. We will leave it
to the Christians, from whom we took it. Its epoch has been
an epoch of decline in our history."

He is in favor of discarding Arabic script, and Islam, all but in name. I see that Turkey has swallowed Nationalism hook and bait.

Turks discard fezzes, Christians don them. Politics sets the fashion, and the market is unsteady.
